

City of Richmond

Report to Committee

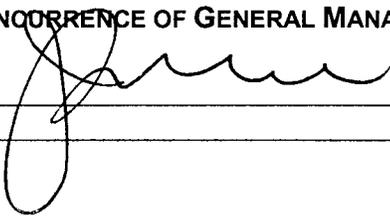

To: Finance Select Committee
From: Andrew Nazareth
Director of Finance
Re: **Calculation of Property Tax Rates**

Date: January 30, 2003
File: 0925-01

Staff Recommendation

That the attached report from the Manager of Taxation regarding the Calculation of Property Tax Rates be received for information.

Andrew Nazareth
Director of Finance

Staff Report

Origin

At the request of the Chair, this report will address the basic fundamentals of tax rate calculation within a municipal setting.

Analysis

Each year in early January, the City receives the Completed Roll from BC Assessment detailing the assessed values of all properties within Richmond’s jurisdiction. Concurrently, property assessment notices are sent to all property owners in BC. Appendix I provides a flowchart of the assessment process from the Completed Roll to the Authenticated Roll. It is important to remember that in the month of January, many properties are being appealed and the final Authenticated Roll assessment figures may be less than the Completed Roll totals.

Based on the initial data received from BC Assessment, the Tax Department calculates the preliminary tax (“mill”) rates required in order to generate the dollars needed to meet the current year’s budget. This takes into consideration the percentage of total revenue currently collected from each tax class. The City collects over 50% of its revenue from Residential properties and 44% from General Businesses. The balance of its revenue comes from Utilities, Major Industry, Light Industry, Seasonal/Recreation, and Farms. The City strives to maintain the same revenue allocation over the years.

The first step in calculating the mill rate is to populate the spreadsheet with the 2002 and 2003 combined assessment values for common properties (properties on the 2002 and 2003 tax roll). See Appendix II for an example of the spreadsheet. The revenue formula is as follows:

Tax Revenue = (Assessment Value/1000) x Mill Rate

where:

- Tax revenue = amount required to balance the current fiscal budget
- Assessment value = the sum of all assessment values within a specific assessment class
- Mill rate = rate required to generate the desired tax revenue

Eg: $(\$12,686,049,099/1000) \times 3.92786 = \$49,829,025$

where:

- (1) \$12,686,049,099 = sum of the 2002 assessments for all common class 01 properties
- (2) 3.92786 = 2002 mill rate for class 01 properties
- (3) 49,829,025 = total revenue collected from common class 01 properties in 2002

Using the formula and the numbers in Appendix II, the sum of the revenues generated in each class using 2002 assessment and 2002 mill rates is \$98,951,161.

The next step is to adjust the mill rate accordingly (Appendix II, column (5)) to ensure that we collect the same revenue from each class as was collected in the prior year. This recalculation adjusts for global market changes in assessment. If this step was omitted, each owner's taxes will be increased or decreased by the same percentage as his assessment change. In order to recalculate the mill rate, we derive the algebraic equation from the previous formula. This is becomes:

Mill Rate = (Tax Revenue/Assessment Value) x 1000

eg: Mill Rate = (49,829,025/14,048,566,683) x 1000

where:

| | | |
|----------------|---|---|
| 49,829,025 | = | 2002 revenue from class 01 |
| 14,048,566,683 | = | 2003 assessment value |
| mill rate | = | new mill required to generate the same 2002 tax dollars |

Once the mill rate is adjusted, the rates must be adjusted again to reallocate any increases to class 02. The rate in this class is legislated by the Provincial government to be no more than \$40 per \$1000 of assessment. Anything above the \$40 limit will be apportioned proportionately to each of the remaining classes (Appendix II, Column (7)).

Finally revenue from new growth is added to arrive at a new revenue total if there were no proposed tax increases. With a 4.83% proposed increase this year, the mill rates calculated under column (7) was adjusted for the increase to arrive at the new required revenue in column (12).

Before the rates are reported to Council, a tax change analysis is produced to determine the effect of the tax increase on each property (Appendix V). This provides a breakdown of the number of properties within each tax class and the tax change percentage as a result of the increase.

Financial Impact

Because the City is mandated to have a balanced budget, any changes in the final budget figure must result in changes in the mill rate . This is because the City is not authorized to collect any more or any less money than is determined through the budgeting process. For example, if the mill rate doesn't change and real estate values increase, the City would most likely collect more than we need in tax dollars. Appendix III & IV, scenarios 1 provide the comparison of 2002 and 2003 assessments where tax rates remains constant over both years. Scenarios 2 uses adjusted rates for the 2003 tax year. It is apparent that without adjusting mill rates, we would over bill for taxes. Conversely, in a bad real estate market and if rates remain constant, the City would not be able to fund its spending. In both cases, we would not meet legislated requirements.

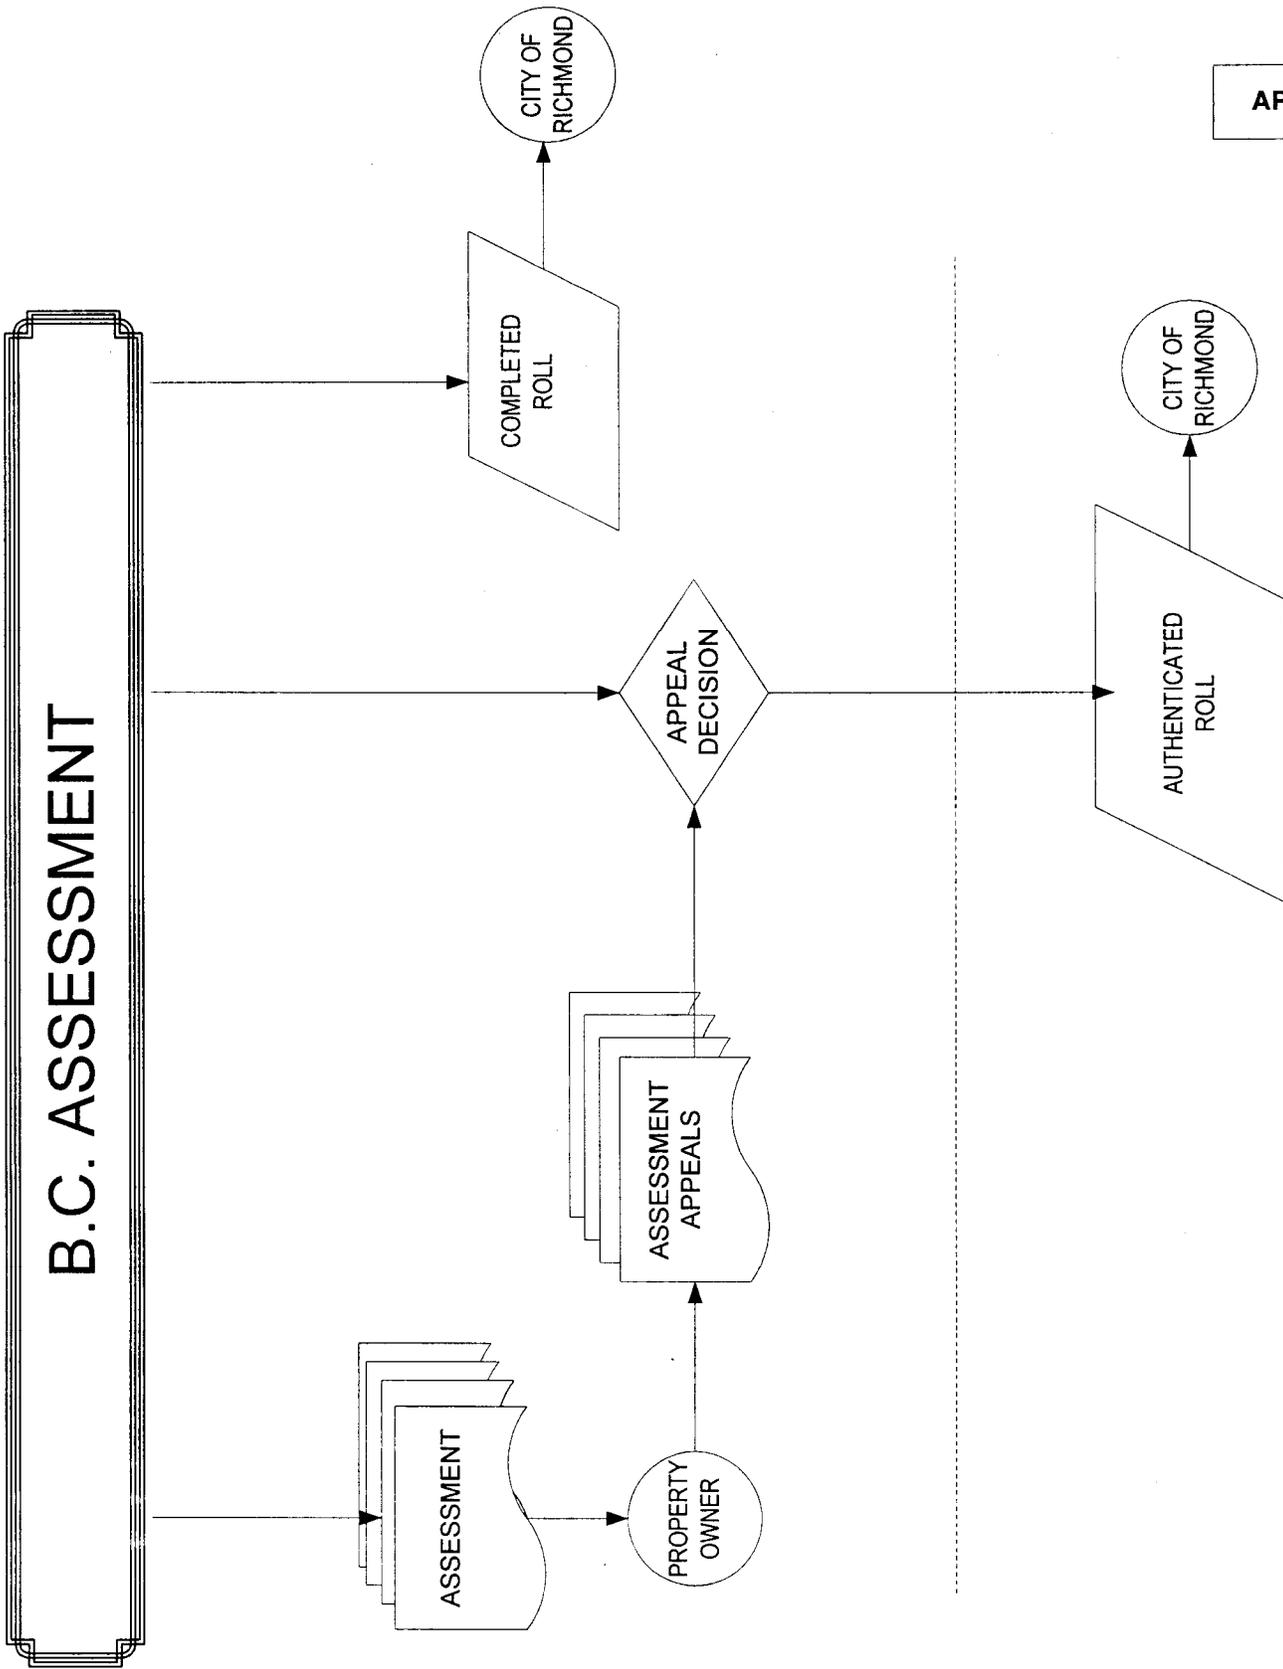

Conclusion

Staff recommend this report be received for information in order to clarify the process of determining the tax "mill" rates.

2002 and 2003 Tax Rate Comparison for Various Classes

Scenario 1: Keeping tax rates constant from 2002 to 2003

| | Assessment Value | | % Change in Assessment | Taxes using 2002 rates | | \$ Change in Taxes | % Change in Tax Dollars |
|----------|------------------|-----------|------------------------|------------------------|-----------|--------------------|-------------------------|
| | 2002 | 2003 | | 2002 | 2003 | | |
| Class 01 | 250000 | 294000 | 17.60% | 981.97 | 1,154.79 | 172.83 | 17.60% |
| Class 04 | 1400000 | 1495000 | 6.79% | 15,141.42 | 16,168.87 | 1,027.45 | 6.79% |
| Class 05 | 4,455,000 | 4,708,000 | 5.68% | 61,247.70 | 64,725.96 | 3,478.26 | 5.68% |
| Class 06 | 198,800 | 205,800 | 3.52% | 2,171.14 | 2,247.59 | 76.45 | 3.52% |

Scenario 2: Adjusting mill rate to reflect a 4.83% increase in taxes in 2003

| | Assessment Value | | % Change in Assessment | 4.83% increase in 2003 | | \$ Change in Taxes | % Change in Tax Dollars |
|----------|------------------|-----------|------------------------|------------------------|-----------|--------------------|-------------------------|
| | 2002 | 2003 | | 2002 | 2003 | | |
| Class 01 | 250000 | 294000 | 17.60% | 981.97 | 1,089.81 | 107.85 | 10.98% |
| Class 04 | 1400000 | 1495000 | 6.79% | 15,141.42 | 16,615.58 | 1,474.16 | 9.74% |
| Class 05 | 4,455,000 | 4,708,000 | 5.68% | 61,247.70 | 67,318.42 | 6,070.72 | 9.91% |
| Class 06 | 198,800 | 205,800 | 3.52% | 2,171.14 | 2,291.11 | 119.97 | 5.53% |

2002 and 2003 Tax Rate Comparison for Class 01 - Residential Properties

Scenario 1: Keeping tax rates constant from 2002 to 2003

| | Assessment Value | | % Change in Assessment | Taxes using 2002 rates | | % Change in Tax Dollars |
|-------------------------|------------------|----------------|------------------------|------------------------|-----------------|-------------------------|
| | 2002 | 2003 | | 2002 | 2003 | |
| Property 1 | 250000 | 294000 | 17.60% | 981.97 | 1,154.79 | 17.60% |
| Property 2 | 508000 | 544000 | 7.09% | 1,995.35 | 2,136.76 | 7.09% |
| Property 3 | 135800 | 149300 | 9.94% | 533.40 | 586.43 | 9.94% |
| Average Property | 240,460 | 267,281 | 11.15% | 944.49 | 1,049.84 | 11.15% |

Scenario 2: Adjusting mill rate to reflect a 4.83% increase in taxes in 2003

| | Assessment Value | | % Change in Assessment | 4.83% increase in 2003 | | % Change in Tax Dollars |
|-------------------------|------------------|----------------|------------------------|------------------------|---------------|-------------------------|
| | 2002 | 2003 | | 2002 | 2003 | |
| Property 1 | 250000 | 294000 | 17.60% | 981.97 | 1,089.81 | 10.98% |
| Property 2 | 508000 | 544000 | 7.09% | 1,995.35 | 2,016.52 | 1.06% |
| Property 3 | 135800 | 149300 | 9.94% | 533.40 | 555.18 | 4.08% |
| Average Property | 240,460 | 267,281 | 11.15% | 944.49 | 990.77 | 4.90% |

TAX CHANGE ANALYSIS SUMMARY
