

to Community Safety - May
09, 2006

Whereas;

File: 09-5350-01

There have been several reports of theft of materials such as copper wire , decorative naming plates and copper piping, seemingly brought on by escalating commodity prices,

And as a result the apparent emergence of the re-cycle centres as a choice to convert the materials to cash.

Therefore be it resolved;

That Staff, in consultation with the RCMP, be directed to seek a solution to the problem perhaps similar to that used in the tracking methods for second hand shops.
