## Staff Report

### Origin

The subject site is located at the north east corner where Blair Drive intersects with Shepherd Drive. Westshore Capital Inc. has applied to the City of Richmond for permission to rezone 10500 Shepherd Drive from Comprehensive Development District C/D 62 – Townhouses to Comprehensive Development District C/D 61 – Single-Family Housing District. The property is currently vacant and the developer is proposing to subdivide the property into 21 single-family lots.

### Findings Of Fact

There is already approximately 89 single-family dwellings in the Odlinwood subdivision which are zoned C/D 61. The 21 lots proposed would be a continuation from the original phase. There is a approved development variance permit DV 00-175-403 for the first phase which provided a number of variances to allow for design flexibility. This phase would not require an additional development variance permit as staff are in the process of amending C/D 61 to incorporate the variances so that the design criteria is covered.

### Analysis

The first phase of Oldlinwood was very successful with the marketplace, and the developer has chosen to forgo building a townhouse development and continue on with the single-family dwelling concept. The proposed 21 lots would be a continuation from the original phase which had 89 single-family dwellings. Staff support the proposed rezoning change and there will be no change to the floor area ratio or lot coverage.

### Financial Impact

None.

### Conclusion

The application is to rezone a property which is currently vacant and zoned for townhouse use in order to create 21 single-family lots which will match the existing Odlinwood single family subdivision. Staff is supportive of the application as it is consistent "Residential" Land Use designation in the West Cambie Area Plan.
