November 07 01

To the City Clerk,

This statement is from Charlaine Badock and residents of 6 & Triangle Rd., We request to be included on the agenda for The Richmond City Council Meeting on November 13<sup>th</sup> 2001. 8275-20-01  
Xref:  
0105-01

The items that that we wish to be heard on are: the ongoing problem that is plaguing our health and our environment and has been doing so for a long period of time. On numerous occasions we (I) have been asked (give us a month, give us three weeks, give us another month), we have been patiently waiting and unfortunately at the expense of our health.

We are in need of answers, we need some communication of which there is none at the moment.

I would like to submit 4 out of five documents to the Mayor and to City Council Members. These statements are from Medical Practitioners (one Specialist) stating the problems and health hazards that we are coping with on a daily basis because of what we have to endure with 1500 – 1800 dump trucks passing our homes, here in the ALR. I will submit the other specialist's document when completed.

Thanking you in advance

*C Badock*
