Staff Report

Origin

On November 29, 2001, construction of a sanitary pump station and associated forcemain in the Temple North sanitary sewer catchment (see Schedule A for a map showing the service area of Temple North sanitary sewer catchment) was substantially completed. This sanitary infrastructure was funded by a consortium of property owners (see Schedule B for a complete list of the property owners) led by the India Cultural Centre of Canada and was sized to meet the needs of the entire Temple North sanitary sewer catchment. The India Cultural Centre of Canada has requested that the City impose a "latecomer charge" on anyone who subsequently connects to the sanitary sewer infrastructure that was funded by the India Cultural Centre of Canada.

Analysis

Through the Local Government Act, Section 939, municipalities can require developers to provide sanitary sewer capacity in excess of that required for the developer's property. In this case, the City required that India Cultural Centre of Canada provide enough capacity in a sanitary sewer pump station and force main for the entire Temple North sanitary catchment, which is in excess of the capacity required for the India Cultural Centre of Canada properties. The India Cultural Centre of Canada would like to recover appropriate costs from benefiting property owners that connect to the Temple North sanitary sewer system as is allowed for in the Local Government Act.

The cost of excess sanitary services initially borne by the India Cultural Centre of Canada totals \$476,781.44. Schedule C, the latecomer charge to each of the benefiting properties, is based on area and it is proposed that the remaining benefiting properties in the catchment pay their share of the cost when they connect to the sanitary system as per the Local Government Act, Section 939(5)(c). Interest shall be applied to the cost for up to 10 years at an annual rate of 8.85% as per City Bylaw 6936. It is noted that the Latecomer Agreement will be in place only for a 10 year period. No charges will be levied beyond the 10 year period.

The City re-paved the road following construction of the sewers and will be reimbursed for re-paving in the amount of \$69,787.85 from the latecomer payments prior to forwarding any payments to the India Cultural Centre of Canada.

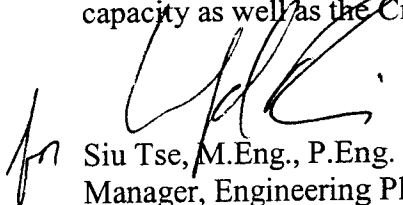

Financial Impact

None.

Conclusion

The properties listed in Schedule C stand to benefit from the sanitary sewer infrastructure funded by India Cultural Centre of Canada, should they wish to connect to the sanitary sewer.

This report enables The India Cultural Centre to recover costs relating to the excess sewer capacity as well as the City recovering costs for re-paving of No. 5 Road.
