Staff Comments

Policy Planning

The proposed project and its contribution to the establishment of a treed and landscaped walkway along the northern property line to provide connections between the two neighbourhood schools are consistent with City objectives and supportive of a high amenity, multiple-family neighbourhood as envisioned under the sub-area plan.

Engineering

Development Applications supports the rezoning application. Prior to final reading, the following must be completed:

- Consolidation of the five lots into one development parcel. This includes completion of the real estate deal in which the rear(north portion) of 9531 Granville Avenue is transferred to the School District and consolidated with the school site at 6611 No. 4 Road.
- Registration of a 0.4m Public Rights of Passage Right of Way for future encroaching sidewalk.
- Then prior to issuance of the future building permit, the developer must enter into the City's standard Servicing Agreement for design and construction of Granville Avenue improvements. Works include, but are not limited to, road widening, curb and gutter, a 1.5m grass and treed boulevard, with 7cm calliper Willow Oak trees, and City Centre Type 3 decorative street lights, and a 1.75m concrete sidewalk which, with all the above, encroaches 0.40m into the development site. This is a continuation of works constructed by the School District from No 4 Road, up to the east Property Line of 9571 Granville Avenue. Granville Avenue is on the Development Cost Charges program, so credits will be granted. There are no other concerns.

Analysis

- The proposed project and its construction of a portion of the school walkway are consistent with Richmond's planning and development objectives and are expected to be an attractive and fitting addition to McLennan North's multiple-family neighbourhood. Consultation with

the School Board to finalize the design of the walkway is required during the development permit process.

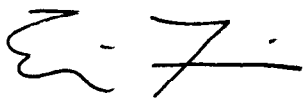

- The applicant's proposal to pay-in-lieu of providing on-site indoor amenity space towards the construction of the future neighbourhood park is consistent with the practice employed elsewhere in McLennan since adoption of the sub-area plans and is considered most appropriate in light of the site's proximity to the proposed park.
- The applicant's proposal to contribute funds towards the City's affordable housing fund is appropriate to meet housing needs.
- The applicant's proposal for shared access and a cross access agreement to benefit the adjacent property to the west at 9511 Granville Avenue ensures the development potential of the adjacent property at a comparable density and minimizes crossings from Granville Avenue, which will improve public safety on the street.
- The project is the first rezoning application for Residential Area 3 south of Alberta Road, and requires creation of a new Comprehensive Development District (CD/142) to permit Two-family dwellings and Townhouses with a maximum Floor Area Ratio (FAR) of 0.70 on the site. The Area Plan identifies a base density of 0.65 FAR on site. The proposed CD/142 allows for a residential density appropriate to the Granville Avenue location, which is comparable to the Area 3 rezonings approved in 1996 north of Alberta Road, at densities of FAR 0.69 and 0.71 for Townhouse developments.

Financial Impact

None.

Conclusion

Rezoning of the subject site as proposed conforms to citywide, city Centre, and McLennan North objectives for residential growth and merits favourable consideration.
