#### Hate Crimes and Incidents

Table 2 presents the number of hate crimes and hate incidents reported between January 1, 2018 and April 30, 2021. A "hate crime" refers to any criminal offence targeting an identifiable group. A "hate incident" may be motivated by the same factors as a hate crime, but does not reach the threshold of being a criminal offence.

## **Financial Impact**

None.

#### Conclusion

In April 2021, the Richmond RCMP conducted a number of noteworthy investigations, including two separate serious vehicle collisions involving a pedestrian and a cyclist. Police statistics for this month indicate that most crime types were within the expected ranges, with the exception of auto theft, which was below the expected range.

In April, the Richmond RCMP Community Engagement Team and volunteers conducted crime prevention deployments focusing on thefts from vehicles. In addition, the DARE program continued its third term, which was delivered via virtual lessons. The Officer in Charge of the Richmond RCMP Detachment will continue to ensure that Richmond remains a safe and desirable community.

# **APRIL 2021 STATISTICS**

### RICHMOND RCMP

This chart identifies the monthly totals for founded Criminal Code incidents, excluding traffic-related Criminal Code incidents. Based on Uniform Crime Reporting (UCR) scoring, there are three categories: (1) Violent Crime, (2) Property Crime, and (3) Other Criminal Code. Within each category, particular offence types are highlighted in this chart. In addition, monthly totals for Controlled Drugs and Substances Act (CDSA) incidents and MHA-related calls for service are included. Individual UCR codes are indicated below the specific crime type.

In 2019, changes were implemented regarding the collection of UCR data. The new standards provide much more stringent criteria to classify a file as unfounded. As a result, there will be an increase in many crime statistics, and clearance rates will conversely decline. This creates numerous challenges when comparing previous years' data. Full details on the Uniform Crime Reporting Survey are available at Statistics Canada: https://www150.statcan.gc.ca/n1/pub/85-002-x/2018001/article/54973-eng.htm. For more information, contact Richmond Crime Analysts.

The 5 year average range data is based on activity within a single month over the past 5 years. If the current monthly total for an offence is above the expected average range (using one standard deviation) due to crime trends, patterns, or spikes, it will be noted in red. If the current monthly total for an offence is above the expected average range due to primarily non-operational reasons such as the new UCR standards or other scoring issues, the total will be noted in purple. Below expected numbers will be noted in blue.
