Comments	<p>Safety concerns re this proposed development. On the property immediately to the South there are seven (7) mature douglas fir trees. Height approx. 60 feet with a girth in excess of 6 feet. With the site preparation that will have to be undertaken the stability of these trees will be negatively effected resulting in a high likelihood that these trees will topple in any subsequent windstorm. My family live with twenty feet of these trees at the South West corner of the site in question and are directly at risk. Can the City please ensure that this safety concern has been addressed and that necessary steps are taken to prevent any future accident which could result in loss of life. Thank you.
