In regards to the development application permit at 5491 No.2 rd.  
I feel that this development would create too much density of housing in this area.  
If this were senior housing I would agree to this application as the vehicle numbers would be less. It will create an excesses amount of traffic for Dover Cres and River rd.. As the number of parking stalls are to be reduced the parking on the street which is already at capacity will affect the current residents in this area. The entrance to this development will also create more traffic hazards for No 2 rd which is already a high traffic accident location.

Regards

Laura Miller

Owner at 5880 Dover Cres.  
Richmond
