**Subject:** planned planting of 6 Black Cottonwood trees

RE: Project Details – 6111/6091 Dyke Road (DP 19-855200  
Planting of 6 Cottonwood Trees

We moved into Nakade 3 years ago . There are several Cottonwood trees directly in front of our Nakade building on the opposite side of the street along Dyke Road.

In the last three yrs I have suffered terribly from allergies due these trees. They are KNOWN to be an allergen!!

The literature on Cottonwoods specifically says " Did you know that : "You may notice your allergy symptoms get worse during the winter and spring, when cottonwood trees produce most of their pollen."<sup>3</sup>

Once the trees blooms, they leave the most incredible amount of mess that attaches to everything in sight .For months the pollen flies thru the air . Our deck, outdoor furniture, the roof and even on our window frames are covered with the stuff!

The other issue with planting all these tall and wide Cottonwood trees ( grow up to 150 feet and 40 feet wide) at this new development is the fact that they will profoundly limit our view of the sunsets that we at Nakade all admire on a beautiful night . This will be forever lost !

Please consider planting trees that are beautiful to look at such as our BC dogwood trees.

Regards, Mrs. E. Mangotich
