

September 4, 2018

Given the legislation on legalization of cannabis will be in effect on October 17, 2018 and there is a great concern about the regulation on home cultivation of cannabis, I would like to move the following motion for Council's consideration.

Motion: Regulations on home cultivation of cannabis

That Council directs

1. Staff to seek clarification from the Province on the enabling legislations for local governments to regulate cannabis cultivation for personal use permitted under the Cannabis Act;
2. Staff to seek clarification from the Province on how regulations in the Cannabis Act related to personal cultivation will be monitored, inspected and enforced; and
3. The City to advocate for the Province to develop, administer and enforce a provincial wide registration/permitting system for cannabis cultivation for personal use permitted under the Cannabis Act.
