

Steve Guthrie 3480 Rosemond

Thank you - opportunity to speak

Must say admire your patience
powers of concentration

- so many
speakers
- so many
varied
opinions

Suggest you - decision real simple

↓
S/B boiled down to what legacy want to leave our
children

Caution Council

→ wary motivation of speaker

→ especially when seeking legal advice

our future
generations

Doesn't give
Cda Lands rep say
shopping land around Min Aja
If 50% already Musqueam
why shopping
around

Council for Musqueam lead you to believe
50% land is already theirs

whether really true → especially if now dies
is he speaking
beyond his
authority

Also [Q] Cda Lands Rep - will never sell to Richmond

Call on you make a decision from best legacy

would
suspect
50

Muddy water
→ Aboriginal
title

What is best legacy - creates or preserves what's in
for Richmond
short supply = of value for
future generations

Suggest

No shortage of concrete
ashfat }
Condo }
Roads }
traffic }
congestion }

What will get
if ALC allow
exclusion

~~Is shortage~~

Is shortage & dwindling supply of

- farm land
- green spaces
- place for nature

Yes agree could use more soccer fields
baseball diamonds
running track

lets be creative

- do we really have to develop last
vestige of green space close to core?

What are other options for rec

- school yards for from being fully utilized for rec
- other lands can be bought for community buildings

Finally - should we succumb to threats

→ must approve or else all will be developed

Richard will get nothing

own legal opinion

→ Aboriginal title of GCL far from certainty

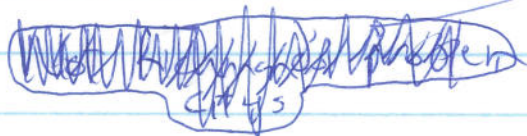

→ recognize Musqueam → No wanting land for their own use

But → turnover for cash

Suggest This opens up other opportunities

⇒ Prov / Feds can compensate in other ways (cash)

cash? / go / opposed
to last

Suggest Council s/Not bow to this type threatening tact

- Decide what leave best legacy

submit to you

- preserve GCL - farming (green space)

- Lobby for better use of that land for future generations.
