**Subject:** Ref: Proposed Traffic Lights on Swallow Drive and Steveston Hwy

Dear Mayor/Councillors,

As a current resident of Westwind / Swallow Drive I am concerned about the proposed implementation of traffic lights and the results traffic volume due to the increased townhome development. What is being proposed will not only increase the amount of cars using Swallow as rat run but also potentially increase the number of cars jumping the lights and causing further accidents.

My other concern is that the development of the town homes will also result in residents of the complex parking cars on Swallow. With the average number of cars per household being 1.5 - 2 and most new townhomes being built to hold 1 car. I believe 43 town homes are being proposed - as Steveston Hwy is a no parking zone, the additional cars will then be parked on the side streets including Swallow.

Regards,

Anuj Sharma
