## Re: The Future of Garden City Lands

I, Jim Tinson  
(Name) support the Garden City Lands development partners application to the Agricultural Land Commission to have the Garden City Lands removed from the Agricultural Land Reserve in order to proceed with their vision for the land including:

Public amenities

Green space

Parkland

Playing fields

Urban agriculture

Social Housing

A new downtown community with mixed-use residential development for families of all ages and income levels on development lands

Thank you,

Jim Tinson

Re: Garden City Lands ALR  
Exclusion Application

Your Worship, member of Council:

My name is Lawrence Lim and I live at 7580 Lombard Road. I would like to speak on 5 main points.

Point #1 – We do not own the Land

*Mar 14/08 RL*

I would like to congratulate the Musqueam First Nation, CLC and the City Council for the very innovative MOU, in allowing the City of Richmond take ownership of 68 acres of the Land. At the moment, the City of Richmond does not have any legal interest in the Garden City Land, it owns nothing and has no direct or indirect claim to the Garden City Land. If the MOU fails, the City has zero.

If the MOU proceeds and the City take ownership of the 68 acres, the City can then adopt its plan for a variety of uses as outlined in the current proposal. We can have our playing fields, parks and the Exhibition Centre. We can even have the urban garden and community garden that the opposition members are proposing. Let it be clear that it is the intention of the City to support small scale urban garden and community garden. If the MOU fails, the City has absolutely nothing and you can forget about your urban garden and community garden. The question then becomes, how much of the 68 acres should the City committed towards urban garden and community garden. I will leave that discussion for another day.

The opposition to this block applications seems to speak in term of wishing to have urban and commercial farming on the Garden City Lands as if they own the land. They are speaking as if the City owns the land or the Federal Government owns the land. Let me remind you, the land is currently owned fee simple by CLC and the Musqueam First Nations jointly and held in trust in the name of CLC.

We must respect the legal rights of these two parties as owners of the land and let us stop telling the legal owners what to do in their land as if it belongs to you. Let me ask the opposition: How do you like someone else to tell you what to do with your own backyard ? How do you like someone telling you to rip off your lawn and force you to have a community garden ? Come on, let us respect the rights of the property owners. You are not the property owner.

It is only after the MOU passes and the land is removed from the ALR that the City will own the 68 acres. At that time, you can all come together and work with the City on how much of the land should be used for community and urban farming. At this time, you should be supporting this block application and ensure that the City will take ownership of the 68 acres first. I will therefore encourage the opposition to adopt this rational approach. Let us not put the cart before the horse.

Point # 2 – The Garden City Land will not be farmed commercially.

One of the Council member even suggested that he does not care who owns it, as long as it stays in ALR. I can assure you that under that scenario, the land will still not be farmed. I do not think the Musqueam First Nation and CLC are interested in farming the land because it is not the right place for any large scale commercial farming that will make any economic sense.

The land will just stay wasted for years to come and the City will not have the 68 acres to work with. We will not be able to have our community farm and urban farm on the property. There is absolute no guarantee that in the next round of negotiation, the City will get anything. I say, a bird in hand is worth two in a bush.

Let us support this block application and at least we can still have our community and urban farm on part of the City's portion.

Point #3 –We are incapable of being self-sufficient in our food supply.

If you go to Safeway and check out the grocery section, you will find most of the items on sale are not grown in Canada. You will probably find potatoes imported from Idaho, Pineapples from Hawaii, rice from Thailand, snow peas from Mexico, grapes from Chile, apples from New Zealand. The honest truth is that we are part of a global economy and we are able to enjoy all these varieties of groceries from all over the world because we have the ability to pay for such imports. You can blame it on our seasonal weather and in the case of the Garden City Land, the soil condition will support only a small variety of crops. Obviously we cannot grow bananas, mangos, rice or even wheat and even coconuts on the Garden City Lands.

The ability to pay for such imports is dependent on our ability to earn money generated from our economic activities. The question then becomes, what is the best use of the Garden City Lands in order to generate the financial resources for us to continue to have our current supply of good. The opposition may say that we retain the land in ALR for agriculture, so we can sell and generate financial resources to pay for the other imported groceries.

The question is then, is large scale commercial agricultural activities on the Garden City Land the most productive way to generate the financial resources as compared to other more productive use of the land. The answer is simple. The answer is NO. The jobs that will be generated by the economic activities from the development of the Garden City Land: the pleasure of having municipal amenities such as parks and soccer fields; the housing that it will provide for economic active citizens of Richmond, who will create jobs and whose jobs will generate the financial resources for our economy; the property taxes that will be generated from the increase in housing stock will have a much higher economic return than growing carrots, cabbages and blueberries. We can still have our small scale community garden and urban gardens.

Point #4 Richmond is not an agricultural small town, it is becoming a modern vibrant metropolitan City.

I am very excited about the City Centre Plan for the City of Richmond. It outlines the future of what the City will look like in the next few decades. We are establishing ourselves as a self-dependent City instead of just a bedroom community for Vancouver. The future is very exciting as we move into the 21<sup>st</sup> century. I want to be part of this maturity of Richmond as we became one of the greatest cities in the world. I did not settle in Richmond to be part of an agricultural small town. If I wanted to do that, I would have settled in Chilliwack.

If you look at some old photos of Richmond say in 1920s. You will see that Richmond is just a bunch of farms. If you take a drive east of No. 6 Road, this was what the west side of Richmond looks like during the 1920s, just a small backward agricultural small town setting.

The same type of argument can similarly be used at that time to retain Richmond for agriculture. The City of Richmond as we know today will not exist. There will still be giant ditches on No. 1 Road, No. 2 Road, No. 3 Road and No. 4 Road. There was a choice for Richmond to become part of an exciting metropolis City or to remain a bunch of rural farm. Our forefathers made the right choice, today, we are part of a prosperous and progressive City.

Point # 5 Garden City Land is capable of providing much needed land for residential development to accommodate the resident of our City.

There will be about 70 acres of high-density development under the MOU and the Garden City Land will provide accommodation for thousands of Richmond residents. If we are unable to develop the Garden City Land, where are the future residents going to live? They may have to move them to Aldergrove and Abbotsford and they will need to drive and commute to Richmond and Vancouver to work. This will add more traffic on the road, causing more air-pollution which I am sure that opposition understands very well.

## Conclusion

I am therefore confident that the Council members will support this block application and will support this very attractive proposal currently outlined by the MOU. The Garden City Land is part of the City of Richmond's future. And the future is not in large scale agriculture on the Garden City Lands, the future is for the Garden City Land to be part of the integral piece of Metropolitan City of Richmond, and we can still have our community garden and urban agriculture. Let us all support this block application and we all will become winners, including the opposition members, whom I greatly admired for

their emotional commitment on their belief. Let us not let this bird fly away and having to search for them in the bushes of the Garden City Lands.

RE: Public Hearing on the Garden City Lands

Your Worship and members of the Richmond City Council,

Richmond has been my home since 1955.

A permanent boundary, to be established around Richmond farmland, was promised to all residents of this community during the last Official Community Plan (OCP) of 1986.

This promise was given at many meetings that I attended, and published on several municipal publications (see page 21 and 22 of the Richmond OCP dated April 1986). But nothing was ever done.

Because of this, there is far more to the dilemma surrounding the Garden City Lands than the keeping or losing of 136 acres in the British Columbia Agricultural Land Reserve (ALR). It has to do with the permanent preservation or loss of thousand of acres of good farmland in Richmond and in many other parts of the province.

If it is not necessary to preserve farmland permanently today there is no need for the ALR or the Agricultural Land Commission (ALC) to exist.

The Garden City Lands is a very small piece in the global farmland puzzle which feeds everyone of us. Without food we simply cannot survive. However, even with all the best intentions one cannot preserve every square foot of farmland on the planet.

As a former Richmond farmer I would not farm the isolated Garden City Lands, mainly due to their location and being surrounded on all sides by four busy roads and highways.

I, therefore, do not see any problem in supporting your request to take this 136 acre parcel of land out of the ALR, but only on one condition: "that the City of Richmond designate and establish a permanent boundary around all farmland located in South and East Richmond, as promised to the residents of this community in 1986".

If we do not start to save farmland today on a permanent basis, wherever we live, we are going to leave a frightening legacy to our grand children. This is a priority and the time to act is now.

Here are a few disturbing facts and numbers which we should ponder about:

- a)- The world population was 2.7 billion in 1955. Today it is 6.6 billion, and projected to be 9.3 billion in year 2050.

/.....

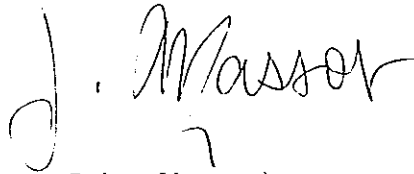

b) The USA - the world largest producer and exporter of food products -- cultivate an estimated 360 million acres of cropland. But they are losing over one million acres of it every year, mainly around metropolitan areas. Would this rate of depletion continue they would lose the totality of their cropland in the next 360 years.

c)- A barrel of crude oil was selling for 37 dollars in 2004. Today it is selling over 100 dollars and we hear some forecast that it could reach 200 dollars before too long.

It is my hope that those few facts and numbers may convince you of the urgency of establishing permanent boundaries around Richmond farmland, not in 20 years but now. You have the power to do so.

Thank you for the privilege to present my views .

Respectfully submitted,

A handwritten signature in black ink, appearing to read "J. Fassot". The signature is written in a cursive, somewhat stylized font.

Reply Submission on behalf of the Musqueam Indian Band to Richmond City Council  
Regarding Comments Made on Musqueam's Aboriginal title As Part of the Public  
Hearings on the Application to Remove the Garden City Lands from the Agricultural  
Land Reserve

By  
Jim Reynolds LL.B., Ph.D., General Counsel, Musqueam Indian Band

March 13, 2008

### Introduction

I know it has been very difficult for all of us to sit through hour after hour of these hearings. It has sometimes been especially difficult for the Musqueam as they have heard their cherished Aboriginal rights described as a "bluff", a "red herring", "fear mongering" and a front for speculation. To my clients, I remind them of the words of Mahatma Gandhi on his own non-violent struggle against the legacy of colonialism – "First they ignore you, then they laugh at you, then they fight you, and then you win." To those who make such comments, I ask them if they would treat in such a dismissive fashion the right to equal treatment under the law protected by section 15 of the *Constitution Act*. Would they make such comments to a person under a disability or from a particular ethnic background who was seeking to enforce rights protected by section 15? If not, why do they feel free to diminish the protection for Aboriginal rights found in section 35 of our *Constitution*? Constitution rights must be taken seriously – they define us as a nation.

Aboriginal rights have been called a "red herring". The Musqueam see them more in the nature of another red fish – the salmon – which has sustained the community for thousands of years and continues to do so.

### Constitutional Recognition for Aboriginal Rights

Section 35 of the *Constitution* recognizes and affirms existing Aboriginal rights. The first major case on section 35 was a case successfully brought by Musqueam to protect its Aboriginal right to fish – the *Sparrow* case. Giving the judgement of the Court, the Chief Justice of Canada said:

"It is clear, then, that s. 35(1) of the Constitution Act, 1982, represents the culmination of a long and difficult struggle in both the political forum and the courts for the constitutional recognition of aboriginal rights. ... Section

35(1), at the least, provides a solid constitutional base upon which subsequent negotiations can take place.”

### Reconciliation

The Musqueam have sought to do what the Supreme Court of Canada has consistently urged – negotiate not litigate. They have been frustrated many times including in the case of the Garden City Lands until they were able to sit down and negotiate with the Government of Canada and the City and to come up with a negotiated agreement in the MOU, an agreement that they still stand behind.

Such agreements are an important part of the process of Reconciliation between the Aboriginal and non-Aboriginal peoples of the Province. This process has been described in another, more recent decision of the Supreme Court as “the fundamental objective of the modern law of aboriginal and treaty rights.” I refer you to the Musqueam Community Needs Submission contained as Appendix 4 B in your binders for more details of the law. Reconciliation has also been accepted by both the Government of the Province and the Opposition as the fundamental objective of the modern relationship between the Province and Aboriginal peoples. This is shown in the New Relationship Accord also described in that Submission which was signed at the about the same time as the MOU.

Only yesterday, the Minister of Aboriginal Affairs and Reconciliation said, during the second reading of the Musqueam Reconciliation Bill:

“Reconciliation is not an event. It is a series of events, a series of interactions. It is about a relationship. It is about building trust. It is about establishing good faith. It is about a feeling that exists between us as people that has been absent for too long. We are beginning to see real signs that it is becoming a reality and is why, when we talk of a new relationship, we do so with a sense of hope and with a sense of confidence, because there is much to point to, to demonstrate that it is becoming a reality.

I think this agreement is tangible evidence of the efforts the parties have gone to, to embrace the notion of a new relationship. I believe that this agreement will meet with the approval of people who believe in the importance of finding a genuine place in British Columbia for the Musqueam, a genuine economic foundation upon which they can develop and provide hope and promise for their people and for their families.”

Reconciliation is a fundamental principle of all issues relating to Aboriginal peoples and not just the B.C. treaty process. Some have tried to find an inconsistency between

reconciliation agreements such as the MOU and the Reconciliation Agreement signed on Tuesday by the Province and the Musqueam. There is no such inconsistency. As noted by the former Chief Federal Negotiator Mr. Bell in his letter to Council of March 11 included in Supplementary Correspondence Package No. 3(i);

“The Garden City Lands Agreement, although outside the official treaty process, is not in conflict with this process but supports the principles of partnership and economic sustainability that the treaty process was created to entrench.”

Obviously, the federal and provincial governments see no inconsistency because they have each entered into reconciliation agreements with the Musqueam before a treaty has been concluded. The Minister of Aboriginal Affairs and Reconciliation said only today:

“Ultimately, it will always depend on the specific circumstances, but I think there are times when an interim or incremental agreement is precisely what’s needed to help the parties get to first base, as it were. If we’re going to stand at the plate and wait for the home run, we may be waiting a long, long time.”

The practical result of the view that there is something somehow inconsistent between treaties and reconciliation agreements is that first nations are being told to wait perhaps decades until the federal and provincial governments get round to negotiating with them at the treaty table and, in the meantime, government-held lands such as the Garden City Lands will be sold so they are not available for treaty settlement. That is unacceptable and would undermine the treaty process.

#### Musqueam’s Aboriginal Title to the Lands

To those who doubt the validity of the Musqueam Aboriginal title to the Garden City Lands, I would echo the words of Professor McArthur last evening – of course, they are Aboriginal title lands. If you really doubt this statement, just go outside this room, turn left down the corridor and look at the very large aerial photograph of Richmond. Look in the top left hand corner and you will see part of the Musqueam Reserve, the site of the main Winter Village for thousands of years based on archaeological evidence. Then look across the Fraser River slightly further to the south-east and you will see what we now call the Garden City Lands. They are located within easy walking distance. Does anyone really think the Musqueam would not have used the Lands located so close to their main settlement? As Elder Larry Point said on Tuesday evening, the very idea that the Lands were *terra nullius* – no man’s land – is both absurd and offensive. Of course, the Musqueam have Aboriginal title that has never been surrendered or extinguished. Our challenge today is how to reconcile that title with the interests of non-Aboriginal people.

I don’t doubt for a minute the sincerity of some of the opponents of the Application who argue strongly in favour of leaving the Lands in their present state or using them for

farming. I am not qualified to speak on the viability of the Lands for farming. However, speaking as a non-Aboriginal person, I believe it is simply unjust for non-Aboriginal people to say to the Aboriginal peoples of this Province that, now that we have taken the great bulk of your land without your agreement and without payment to you and developed it for our benefit, we demand that whatever undeveloped land remains, must be kept by you as green space for our enjoyment and you must remain in poverty. That statement is simply a continuation of a colonial attitude dressed in green clothing.

### The MOU and “the Beauty of Compromise”

I also don't doubt for a minute the sincerity of some of the opponents in their interpretation of the MOU and the Purchase Agreement. I commend them for being willing to hack through the tangled undergrowth of legal documentation. However, I do not agree with their interpretation of some of the provisions. But I see no point in dealing with each issue now. If, which I hope is never the case, we need to resolve any difference of interpretation, it will be done through a form of dispute resolution mechanism and not by the City Council or the Commission.

My more fundamental response is that this kind of legalistic approach ignores the truly impressive achievement embodied in the agreement between the City and the Musqueam. I would like to quote again from Mahatma Gandhi, “All my life through, the very insistence on truth has taught me to appreciate the beauty of compromise.” I see the MOU as representing “the beauty of compromise.” Professor Doug McArthur said last night that compromises were rarely tidy – there are gaps and no one party is fully satisfied. But, if you go above the interests of any one party and look at the MOU as a whole, it embodies fundamental Canadian values – the value of compromise – the reconciliation of diverse interests – respect for other people. In that sense, the MOU is not only an historic document, it is also a thing of beauty and a very Canadian document – it represents the coming together of people of diverse origins and the practical implementation of what the former Chief Justice of Canada said in the *Degamukw* case, a decade ago, which clearly recognized Aboriginal title – “Let's Face it, We are All Here to Stay”, a view that Chief Campbell echoed on Tuesday evening.

### Conclusion

In conclusion, I confirm again the desire of the Musqueam to implement the MOU and to honour its terms. They request no less from the City of Richmond - let the “beauty of compromise” and reconciliation prevail.

## Public Hearing re: Garden City Lands

Richmond City Hall  
6911 No. 3 Road

Tuesday, March 11, 2008

7:00 p.m.

Attention: Mayor Brodie and Members of the Richmond City Council

Good evening, Your Worship and Members of the Council. My name is Henry Beh and I have been a resident of Richmond for over 30 years. I am currently the Executive Director of the Richmond Chinese Community Society (RCCS).

I am here this evening to speak on behalf RCCS that our members support the Garden City Lands development partners application to the Agricultural Land Commission to have the Garden City Lands removed from the Agricultural Land Reserve.

The development of the Garden City Lands has the potential to give the Richmond downtown core not only a new community built on state of the art sustainable principles, but also provide much needed parks, green space, playing fields, library, community centre, and recreation areas. We are convinced that this is the best of the possible outcome for Richmond.

I have with me over 200 of signed forms<sup>\*</sup> by our members who support this application. I will submit them to the City Clerk after this.

*to be circulated at the public hearing continuation*

Thank you,

Henry Beh  
Executive Director  
Richmond Chinese Community Society

To the Mayer and Councillors

It is strange that councillors and the mayor of the city of Richmond are not interested in representing the wishes of the majority of the citizens and rather put themselves on the side of those just interested in profit.

I and my husband want to put our strong OPPOSITION to the proposed removal of the Garden City Lands from the ALR for several obvious reasons.

When will we stop to cover our precious land with asphalt and cement?!! Haven't we changed a rich farming area into a big city already with all the health - destroying things that come along with it. And now even a small piece of green space city hall wants to give permission to destroy. Thank you so much!! I hope you think long and hard about what you intend.

Your Worship Mayor and Respected Councilors;

It is an honor to address you all on the subject of Garden City Lands. As many Richmond residents I followed up the previous council discussions of this subject and felt obliged to express my thoughts. We need more green space in Richmond and Garden City lands should provide a good space for the residents who's number is on the rise.

Re: Public hearing submission – Garden City Lands application for ALR exclusion

Dear Mayor and Council:

I oppose the removal of the Garden City Lands from the Agricultural Land Reserve for the following reasons:

1. It is prudent to retain some limited ability to be self-supporting in growing food for our city's population should it be needed. The current available agricultural land within our city is sufficient to supply no more than five percent of our population's food needs. To further diminish this meager quantity is irresponsible toward present and future generations. Future municipal growth and development must be sustainable growth. The mounting concern about global warming, climate change, and rising transportation costs should make the Richmond Council and residents cautious in assuming that California and Mexico will continue to supply our food needs in an affordable and sustainable manner. Recent steep increases in the price of corn and wheat due to demand for crops for bio-fuels should be a warning. They should not be ignored.

2. The provincial government has recently adopted stringent proposals designed to make our province a leader in treating the earth's limited resources in a more sustainable manner. To meet those goals, reducing the transportation requirements to supply our food needs is imperative. The city's policies related to land use should aim to complement, not detract from, the provincial efforts. Both levels of government serve the same public.

3. The Richmond City centre is lacking appropriate amounts of green space in proportion to its residential and commercial density. Increasing residential and commercial density on the Garden City Lands adjacent to the City Centre is imprudent development. Since green spaces are lungs of a city, I implore the Richmond Council to retain the allocation of the Garden City Lands within the Agricultural Land Reserve.

The needs of the City of Richmond today are about and for the future!

Sincerely,

Lesley A. Pope

to Council G...

Dear Mayor and councillors;

I do not agree with the conversion of any designated farmland to housing or commercial uses. We are entering a critical time in our history when we should be more concerned about clean air, a ready supply of clean potable water and maintaining the capacity to feed ourselves within the immediate region we live in. As you may have seen in a recent National Geographic article the source of a good portion of our food, the south western United States, is drying out and the dependable supply of food from that region is uncertain.

Please see the attached document.

Thank you.

Comments:	<p>I strongly oppose the application to remove the Garden City Lands from the ALR. The City of Richmond is sadly overlooking the vast future benefits of creating green space for its current and future residents, including creating food growing spaces for teaching youth about self-sustainability, and providing green space for public use and preserving the sensitive ecosystem that exists in the Garden City Lands. While development may seem a good idea in the short term with regard to monetary gain, the significant loss of habitat greatly outweighs this in the long run. The cost of development for residential housing that will ultimately crumble to the ground in 50 years or become another "leaky condo" fiasco, is horrendous. Paving the entire piece of land, putting in proper waste management infrastructure, and not to mention the pollution resulting from the building process and subsequent living/recreation facilities, shopping establishments would be detrimental to Richmond. Reclaiming the land in the future would result in significant cost, not only monetarily but never could the ecosystem that exists now, untouched, be duplicated as the unique species of plants and other organisms have now. I implore you to think sustainably for our future. Think and consider beyond 10 or even 50 years. Would our grandchildren be proud</p>

of the decisions being made right now? Would you rather be able to say to them that you voted to retain a green space for their enjoyment, away from the concrete jungle or would you be ashamed to say that you voted in favour of housing development that killed the most unique piece of land in Richmond and all the wildlife that is associated with it? I, for one, hope that you make the right decision to keep the Garden City Lands in the ALR.

Re: Public hearing on the Garden City Lands, 5555 No. 4 Road, Richmond

Although I do not reside in the city of Richmond, I wish to register my opposition to the City of Richmond's block application to remove the lands known as the "Garden City Lands" from the province's Agricultural Land Reserve (ALR).

I am sending this note as a resident of British Columbia who feels strongly that we need to maintain the limited available food production capacity for current and future food security needs.

As the era of relatively inexpensive energy comes to a conclusion, and farm lands around the planet are increasingly cultivated for energy crops, the importance of conserving food lands must become apparent. Those food lands located close to urban areas will become particularly critical.

Food security is important to all British Columbians and we need to keep agricultural land so that future generations can feed themselves, particularly in urban environments like Richmond.

Thank you,

Re: Public hearing on the Garden City Lands, 5555 No. 4 Road, Richmond

**Keep Garden City Lands Green**

I, Louise Hudson, OPPOSE the City of Richmond's block application to remove the Garden City Lands from the Agricultural Land Reserve (ALR) for the following reasons:

As a former citizen of Richmond, I am concerned about the number of high rises and the build up of central Richmond. When I drive into Richmond along Westminister Highway I cannot but wonder where people are going to find some green space among all these apartments and condos. Citizens need green space for recreation, for just wandering around, or sitting on benches. Children need space to run and play. Citizens will want to enjoy their own garden plot and in the future we will need every plot of land to grow food.

One of the reasons I moved from Richmond was the continual growth, the lack of city park space, and the increased traffic. Keeping lands green will improve the inner city.

- The City of Richmond has a shortage of green space and we need to keep it.
- Food security is important to me and we need to keep agricultural land so that future generations can feed themselves
- The City of Richmond does not need a lot more high rises. Development on the Garden City Lands will only increase traffic, congestion and pollution in the downtown core.

Keep the Garden City Lands in the ALR so that ALL the citizens of Richmond can enjoy it.

Re: proposed ALR exclusion application for: Garden City Lands, 5555 No. 4 Road, Richmond BC

To the Mayor and Council of Richmond, BC:

I am writing to express my opposition to the proposed removal of 136 acres from the Agricultural Land Reserve at 5555 No. 4 Road, Richmond BC. The need for farmland near city centres is widely recognized, and people are increasingly aware of the need to eat locally and to expand local agricultural capacity. For example, last year the citizens of Powell River and Powell River Regional District resisted a proposal to remove 847 acres from the Agricultural Land Reserve within Powell River city limits. Many people who understood the true value of those lands for future agricultural needs raised their voices in protest against a ridiculous proposal to convert them into an airport and gated community for rich foreigners. As in Richmond, it was the elected municipal leaders pushing for the removal of farmland, and the city of Powell River is still one third of a joint venture to develop Powell River's economy by any means possible. As in Richmond, the interests of large-scale development were given more attention than an inventory of available agricultural lands, an evaluation of the food needs of the citizens, and a recognition of the present state of the globalized agricultural industry and its future prospects.

The Garden City lands now under threat of removal are prime agricultural lands, and ideal for use as a food-producing model of urban agriculture. Although it might not yet be evident to the Mayor and Council of the City of Richmond, these lands represent a precious resource that could be used to feed many of the residents of the City and surrounding areas in years to come when food from afar will be less available and more expensive. Business as usual just won't go on indefinitely.

The people of Richmond look to their local politicians to exercise prudence and good judgment, and to serve the interests of all citizens equally. Please consider putting the brakes on the rush to develop these lands. Please consider the present and future food needs of your community. Please consider the need for green space in the city. Please consider the rising costs of transportation of food from around the world into Richmond, and the accompanying huge costs in the form of global warming, pesticide use and consolidation of agriculture in the hands of only a few mega-corporations. The future lies in an increasingly localized food economy – communities that truly feed themselves.

You have the opportunity to be the Mayor and Council that lead the way for other municipalities in BC and elsewhere in Canada. You can stand as a model of wise governance, foresight and demonstrate awareness of food security and a willingness to act in the long-term public interest.

Please do not remove these lands from the ALR.

Sincerely,  
David Counsell  
Black Point, BC

Attn: Richmond City Clerk  
Re: Public hearing on the Garden City Lands, 5555 No. 4 Road, Richmond

**Keep Garden City Lands Green**

I, Patricia Mary Lynn, OPPOSE the City of Richmond's block application to remove the Garden City Lands from the Agricultural Land Reserve (ALR) for the following reasons:

- The City of Richmond has a shortage of green space and we need to keep it.
- Food security is important to me and we need to keep agricultural land so that future generations can feed themselves
- The City of Richmond does not need a lot more high rises. Development on the Garden City Lands will only increase traffic, congestion and pollution in the downtown core.

Keep the Garden City Lands in the ALR so that ALL the citizens of Richmond can enjoy it.

Patricia Lynn

Re: Public hearing on the Garden City Lands, 5555 No. 4 Road, Richmond

Keep Garden City Lands in the ALR.

I, Robert E. Smith, emphatically **OPPOSE** the City of Richmond's block application to remove the Garden City Lands from the Agricultural Land Reserve (ALR). There are many, many reasons but the following are paramount -

\*

The City of Richmond and Metro Vancouver have a critical shortage of green space and we need to keep what we have.

\*

Food is important to the human race and we need to keep agricultural land so future generations can feed themselves. This site is one of the best agricultural lands in the world - please don't destroy it.

\*

The City does not need more high rises. Development on the Garden City lands will only increase traffic, congestion and pollution in this area and throughout metro Vancouver. We have to stop somewhere so lets make it now. Don't let the almighty dollar cloud your thinking.

Keep the Garden City Lands in the ALR so that the citizens of Richmond and the world can enjoy it forever.

Robert E. Smith

**Keep Garden City Lands Green**

I, Mary Otto, am writing to support my MP, John Cummins' letter of March 13, in which he wrote opposing the City of Richmond's block application to remove the Garden City Lands from the Agricultural Land Reserve.

I agree with him that the City of Richmond has a shortage of green space, so we need to keep this.

We also need to keep agricultural land so that future generations can feed themselves.

Traffic congestion and pollution is already a problem in the downtown core, and we do not need more high rises and development on the Garden City Lands to add to this.

Please keep the Garden City Lands in the ALR so that all the citizens of Richmond can enjoy them.

Sincerely,

Mary M. Otto (Mrs.)

Dear Mayor and Council of Richmond:

A few years ago, I had the pleasure of living on No.2 Road in Richmond while working in the area. You are richly blessed with beautiful soil in your area of the Fraser River Delta and keeping farmland near the urban centres is very important now and in the future.

Farmland should not be paved over and there should no net loss of farming area within any community. We are not about to discover any new places to carry out farming activity.

Farming creates and increases food culture. The best chefs are always proud to promote their local produce; and your produce is especially fantastic! With such a diversity of cultures living in your area; the food will be appreciated. Local farming will only add to the tourism potential.

Please save these highly visible lands; keep the acreage available for food production.

Dear Richmond City Mayor and Councillors;

I am writing to implore you to keep the Garden City lands green.

I OPPOSE the City of Richmond's block application to remove the Garden City Lands from the Agricultural Land Reserve (ALR) for reasons including the following:

- We need to keep agricultural land in the whole of British Columbia, but especially in the lower mainland, for food security for future generations. Have you noticed the price of oil lately?
- High-density development on the Garden City Lands will only increase traffic congestion and pollution in Richmond's downtown area.

Keep the Garden City Lands in the ALR for the people's benefit.

Yours sincerely,

I OPPOSE the City of Richmond's block application to remove the Garden City Lands from the Agricultural Land Reserve (ALR) for reasons such as the following:

- The City of Richmond has a shortage of green space and we need to keep it.
- We need to keep agricultural land for food security for future generations.
- High-density development on the Garden City Lands will only increase traffic congestion and pollution in Richmond's downtown area.
- It is extremely important to maintain local agricultural lands to maintain a timely and economic local food supply for the Lower Mainland. Although it may be economic at present to import much of our food from international sources, this situation is changing rapidly. If we forfeit our local agricultural lands, the process is not reversible and will create a food supply crisis in the near future. The Land Reserve system of British Columbia is envied by countries around the world whose urban development is already creating a food supply crisis. Although the ALR is imperfect, it is the best we have developed so far, and must not be undermined. The ALR does not handicap development; it only forces development to plan more carefully and efficiently. The ALR draws it to everyone's attention that land is a precious resource and should not be needlessly squandered.

Keep the Garden City Lands in the ALR for the people's benefit.

Re: Public hearing on the Garden City Lands, 5555 No. 4 Road, Richmond

### Keep Garden City Lands Green

I, Douglas MacQuarrie, OPPOSE the City of Richmond's block application to remove the Garden City Lands from the Agricultural Land Reserve (ALR) for the following reasons:

- The City of Richmond has a shortage of green space and we need to keep it.
- Food security is important to me and we need to keep agricultural land so that future generations can feed themselves
- The City of Richmond does not need a lot more high rises. Development on the Garden City Lands will only increase traffic, congestion and pollution in the downtown core.
- The main attraction point of living in Richmond is the amount of agricultural land in the ALR...if I wanted to live in downtown 'highrise' Vancouver – I would move there...I don't.

Keep the Garden City Lands in the ALR so that ALL the citizens of Richmond can enjoy it.

**Subject:** Re: Public hearing on the Garden City Lands, 5555 No. 4 Road, Richmond

Dear Mayor and Councillors,

I'm writing to express my serious concern about the possibility that the Garden City Lands may be removed from the ALR. I think such a decision would be very short sighted. All indicators point to a future where food security will be serious issue. A significant portion of our food supply is imported and our ability to import an adequate supply is certain to be negatively impacted by factors such as:

- \* global climate change
- \* population growth (here and elsewhere)
- \* increased use of food crops for biofuel

There may be uncertainties when predicting what the combined impact of these factors may be, but whether you believe the impact will be severe or mild you must acknowledge that with uncertainty comes risk. These factors are only beginning to be understood but they are receiving significant attention now. Research and experience over the next decade are likely to reduce the uncertainty and risk associated with decisions such as the one you are now considering.

It's my sincere hope that you will have the wisdom to err on the side of caution until more information is available so that the true impact of your decision can be better understood. Please vote to keep the Garden City Lands in the ALR.

Best regards,

Re: Public hearing on the Garden City Lands, 5555 No. 4 Road, Richmond

I, Mary Rogers, OPPOSE the City of Richmond's block application to remove the Garden City Lands from the Agricultural Land Reserve (ALR) for the following reasons:

\*The City of Richmond has a shortage of green space and we need to keep it.

\*Food security is important to me and we need to keep agricultural land so that future generations can feed themselves

\*The City of Richmond does not need a lot more high rises. Development on the Garden City Lands will only increase traffic, congestion and pollution in the downtown core.

Keep the Garden City Lands in the ALR so that ALL the citizens of Richmond can enjoy it in perpetuity.

**Subject:** Garden City Lands.

Dear Mayor Brodie & Councillors;

We wish to inform you that my wife and I are opposed to these lands being removed from the ALR. These lands represent an opportunity to expand the urban agricultural agenda and make a Richmond a center and show place for such agricultural activity. This reason alone is enough cause to stop your plans for development of apartments and condos at this time. We are just not making any more green space. What we now have should not be paved over.

Richmond, in our view, has all the development that it can handle going on at this very moment. Let the developers move on to some other part of metro Vancouver. In addition to our believe that this land should be developed as agriculture, we have little confidence in our city leadership being able to implement their own planning guidelines for such a development. There are far too many streets plugged with parked cars because developers have been able to cry to councilors that they need an exemption from the planning guidelines in order to break even on their development. The city is too hungry to keep developers happy.

We urge you to keep the Garden City Lands for agricultural use and stiffen your back bones a great deal when you meet with developers.

Eric and Maureen Sykes  
4760 Moncton Street.

URGENT ACTION NEEDED BY MONDAY March 17th, 5 p.m.

Dear Conservative Supporter - Our MP, **John Cummins**, has written to Richmond Mayor and Council concerning the current attempt to remove the Garden City Lands from the Agricultural Land Reserve, and has met urgently with Honourable Gerry Ritz, Minister of Agriculture, concerning this issue. A copy of his letter is attached. John is doing his utmost to provide the best possible outcome for Richmond.

John is being opposed in this by Liberal MP Raymond Chan. We have been made aware that a supporter of Mr. Chan has been collecting letters opposing John's position and may be submitting up to 200 of these on Monday. We are therefore taking this VERY unusual and most urgent step of contacting you directly by e-mail to ask that YOU - and anyone you know - PLEASE send in a letter (preferably) supporting John's position. Personalized letters are always to be preferred, but every copy sent in of the simple sample letter provided below will help. **These letters MUST be submitted by 5 p.m. MONDAY March 17th to [mayorandcouncillors@richmond.ca](mailto:mayorandcouncillors@richmond.ca).** Again, please email them to [mayorandcouncillors@richmond.ca](mailto:mayorandcouncillors@richmond.ca).

Thank-you! Sincerely, **Salomon Rayek**  
President, Delta Richmond East EDA, Conservative Party of Canada

Mayor and Council:

**Re: Garden City Lands Block ALC Application**

This submission is advanced pursuant to the invitation to the public to make their views known at the public hearings you are currently conducting concerning the block application you are advancing to the BC Agricultural Land Commission to exclude the federally-owned Garden City Lands from the Agricultural Land Reserve.

I support the position our MP, John Cummins, has communicated to you, when the CLC **last applied unsuccessfully** to exclude these lands from the Land Reserve. I believe the current application should be rejected as these lands are **prime agricultural lands**. Moreover, these lands represent a unique opportunity to seize the emerging urban agricultural agenda which can include local, regional, national and international research, education and commercial development. The entire land base should be secured for these and other public agricultural and related uses.

The terms of the March 18, 2005 tri-partite Memorandum of Understanding will not result in an outcome that is in the best interests of the constituents in Richmond, or of other citizens throughout the Lower Mainland.

You should know that on March 13, 2008, our MP, John Cummins, met in Ottawa with the Honourable Gerry Ritz, P.C., Minister of Agriculture, together with a representative of Richmond citizens opposed to the planned disposition of the Garden City Lands and discussed the situation. There are continued efforts in Ottawa to ensure that this matter is resolved in a way that benefits all the citizens of Richmond.

Again, I wish to reiterate that I, along with countless others, do not support your exclusion application.

Sincerely,

Dr. and Mrs. Hellmut May

I am writing to express my concern over the rush to destroy one of the last major land areas in the centre of Richmond. There is no justification for this desecration of our greenspaces other than the apparently insatiable appetite for more and more money to be used to satisfy the demand, not the need, from developers. The "Agricultural Land Reserve" was implemented to preserve green space for everyone, not just farming, and can only be described, if one is honest, as the most unsordid act of any political jurisdiction in B.C. It would therefore be a betrayal of trust, and the destruction of a legacy, by any body which supported the removal of the "Garden City" lands from the Agricultural Land Reserve. Don't give away this large green space in Richmond. It can not be replaced.

March 17, 2008

Mayor and Councillors  
City of Richmond  
6911 No. 3 Road  
Richmond, BC  
V6Y 2C1

Dear Mayor and Councillors:

Re: Public Hearing concerning Garden City Lands  
Application to remove 135 acres at 5555 No. 4 Rd. from ALR

I OPPOSE the removal of the Garden City Lands from the Agricultural Land Reserve.

The Agricultural Land Reserve was created by people who had the foresight and wisdom to see that the day would come when lands capable of feeding our population would be under threat from developers and would need extreme protection for the benefit of the population as a whole. That day has come.

The idea that the highly productive Garden City Lands are needed to house the theoretical hordes that are coming and must be housed is specious: if there are houses on these lands, how we will feed those who live in them?

In Delta, hundreds of acres of some of the best agricultural land in the province are being removed from the ALR, not by the Land Commission or the municipal Mayor and Council, but by the Provincial government to serve the Gateway projects. In addition, the Mayor and Council, to their shame, recently agreed to the removal of ALR lands for a residential development project. You have the opportunity to say "No" to this profit-motivated assault on our food lands. To do so, will be to provide a sustainable future for your residents and to display the same foresight and wisdom as those who created the ALR.

I know how difficult it will be for you to rebuff the pressure of the developers and of the Provincial government to allow these lands to be developed. However, this application must be considered in the wider context of productive lands throughout the province and the accelerating loss of those lands. I don't live in Richmond, but removal of these lands from the ALR will negatively affect me and every other person in British Columbia.

Please. Make your decision with an eye to the future. To rob our children of food producing lands is wrong.

I oppose this application.

Re: Public hearing on the Garden City Lands, 5555 No. 4 Rd. Richmond.

I, Elizabeth Anderson, oppose the City of Richmond's block application to remove the Garden City Lands from the agricultural Land Reserve.

The City of Richmond has a shortage of green space and we need to keep this land in the ALR.

We definitely do not need the development suggested for this property and most definitely do not need the traffic and congestion that will be a result of developing this land.

Please let the citizens of Richmond enjoy some green space in the centre of their city.

Re: Public hearing on the Garden City Lands, **5555 No. 4 Road, Richmond**

**Keep the Garden City Lands Green.**

I OPPOSE the City of Richmond's block application to remove the Garden City Lands from the Agricultural Land Reserve (ALR) for the following reasons:

- The City of Richmond has a shortage of green space and we need to keep it; it already looks like a giant strip mall.
- We need to preserve agricultural land for growing food to ensure food security for future generations.
- High-density development on the Garden City Lands will only increase traffic congestion and pollution in Richmond's downtown area.
- This is an opportunity to show enlightened leadership and to be a model for other municipalities; paving the ALR is shortsighted and flies in the face of true sustainability.

Keep the Garden City Lands in the ALR to enhance and ensure the quality of life for the people of Richmond and beyond its borders.

**Keep Garden City Lands Green**

I, Dr. L. Sue Liptrot, OPPOSE the City of Richmond's block application to remove the Garden City Lands from the Agricultural Land Reserve (ALR) for the following reasons:

The City of Richmond has a shortage of green space and we need to keep it.

Food security is important to me and we need to keep agricultural land so that future generations can feed themselves

The City of Richmond does not need a lot more high rises. Development on the Garden City Lands will only increase traffic, congestion and pollution in the downtown core.

Keep the Garden City Lands in the ALR so that ALL the citizens of Richmond can enjoy it.

Re: Public hearing on the Garden City Lands, **5555 No. 4 Road, Richmond**

**Keep the Garden City Lands Green.**

I OPPOSE the City of Richmond's block application to remove the Garden City Lands from the Agricultural Land Reserve (ALR) for reasons such as the following:

- The City of Richmond has a shortage of green space and we need to keep it.
- We need to keep agricultural land for food security for future generations.
- High-density development on the Garden City Lands will only increase traffic congestion and pollution in Richmond's downtown area.

Keep the Garden City Lands in the ALR for the people's benefit.

### Attn: Richmond City Clerk

Re: Public hearing on the Garden City Lands, 5555 No. 4 Road, Richmond

As a Richmond resident, I am opposed to the City of Richmond's application to remove the Garden City Lands from the Agricultural Land Reserve. I believe that The City of Richmond already has a shortage of green space and we should retain what we have.

I believe also that it is important that agricultural land be retained in the interest of food security. With the rising cost of fuel adding to the grocery bill, I think keeping/creating local food sources is even more important. Far more important than more high rises and the subsequent traffic, congestion and pollution!

Finally, I do not think that City Council is acting in the best interest of the citizens of Richmond. The biased telephone survey that was conducted did not help convince me otherwise.

Mayor and Council:

RE: GCL Public Hearings, Richmond, BC

I do not support your exclusion application concerning the Garden City Lands.

Please consider that agricultural land, once lost, can never be replaced, whereas alternatives exist for all the uses proposed for this parcel.

The Garden City Lands should be preserved IN TOTAL for future agricultural use.

I support MP John Cummins' position on this matter.

Sincerely,

Kent Warmington

Comments:	I'm a student at Kwantlen University in Richmond, and I vote that the Garden City Lands remain as they are. Not only is the piece of land a gorgeous view on my drive into school in the morning, but it is a home for several kinda of wildlife. There is no reason for the land to be converted into homes simply because "it is not being used for anything" nature isn't supposed to be used for anything, it's nature. Please don't destroy one of the last places of natural land in the area.

Comments:	I'm currently a Kwantlen student and I oppose the application to remove Garden City Lands from the ALR because the city of richmond needs a lil more green in the middle of its busy commerical streets. Looking out from our studio classroom, we get to enjoy sunrises in the mornings throughout the year and it would be a shame to lose a view like that to more commerical and residential spaces. We've got enough buildings in richmond. Keep this area the way it is!

Re: Public hearing on the Garden City Lands, 5555 No. 4 Road, Richmond

I, Ky Co, would like to extend my support to our MP, John Cummins' position to oppose the City of Richmond's block application to remove the Gargen City Lands from the Agricultural Land Reserve (ALR). The City of Richmond does not need a lot more high rises. Development on the Garden City Lands will only increase traffic, congestion and pollution in the downtown core. Attempts should be made to spread out the growth, so that citizens do not need to all travel to the downtown core for their daily needs.

So please keep the Garden City Lands in the ALR so that ALL the citizens of Richmond can enjoy it.

URGENT ACTION NEEDED BY MONDAY March 17th, 5 p.m.

Dear Conservative Supporter - Our MP, **John Cummins**, has written to Richmond Mayor and Council concerning the current attempt to remove the Garden City Lands from the Agricultural Land Reserve, and has met urgently with Honourable Gerry Ritz, Minister of Agriculture, concerning this issue. A copy of his letter is attached. John is doing his utmost to provide the best possible outcome for Richmond.

John is being opposed in this by Liberal MP Raymond Chan. We have been made aware that a supporter of Mr. Chan has been collecting letters opposing John's position and may be submitting up to 200 of these on Monday. We are therefore taking this VERY unusual and most urgent step of contacting you directly by e-mail to ask that YOU - and anyone you know - PLEASE send in a letter (preferably) supporting John's position. Personalized letters are always to be preferred, but every copy sent in of simple sample letter provided below will help. **These letters MUST be submitted by 5 p.m. MONDAY March 17th to [mayorandcouncillors@richmond.ca](mailto:mayorandcouncillors@richmond.ca).** Again, please email them to [mayorandcouncillors@richmond.ca](mailto:mayorandcouncillors@richmond.ca).

Thank-you! Sincerely, **Salomon Rayek**  
President, Delta Richmond East EDA, Conservative Party of Canada

Mayor and Council:

**Re: Garden City Lands Block ALC Application**

This submission is advanced pursuant to the invitation to the public to make their views known at the public hearings you are currently conducting concerning the block application you are advancing to the BC Agricultural Land Commission to exclude the federally-owned Garden City Lands from the Agricultural Land Reserve.

I wish to reiterate the position I communicated to you when the CLC last applied unsuccessfully to exclude these lands from the Land Reserve. I believe the current application should be rejected as these lands are prime agricultural lands. Moreover, these lands represent a unique opportunity to seize the emerging urban agricultural agenda which can include local, regional, national and international research, education and commercial development. The entire land base should be secured for these and other public agricultural and related uses.

The terms of the March 18, 2005 tri-parite Memorandum of Understanding will not result in an outcome that is in the best interests of my constituents and other citizens of Richmond.

You should know that I met this morning in Ottawa with the Honourable Gerry Ritz, P.C., Minister of Agriculture, together with a representative of Richmond citizens opposed to the planned disposition of the Garden City Lands and we discussed the situation. We are continuing our efforts in Ottawa to ensure that this matter is resolved in a way that benefits the citizens of Richmond.

Again, I reiterate that I do not support your exclusion application.

Yours truly,

John Cummins, M.P.  
Delta - Richmond East

**Attn:** Richmond City Clerk  
**Re:** Public hearing on the Garden City Lands, 5555 No. 4 Road, Richmond

**Keep Garden City Lands Green**

I, Kenneth Weston Simms, OPPOSE the City of Richmond's block application to remove the Garden City Lands from the Agricultural Land Reserve (ALR) for the following reasons:

- The City of Richmond has a shortage of green space and we need to keep it.
- Food security is important to me and we need to keep agricultural land so that future generations can feed themselves. This issues affects all British Columbians, not just those in Richmond.
- I work in Richmond and live in neighbouring Ladner. I strongly believe that the Development of the Garden City Lands will only increase traffic, congestion and pollution in the downtown core and throughout the region.

Keep the Garden City Lands in the ALR so that ALL the citizens of Richmond and the region can enjoy it.

Kenneth Weston Simms      March 16, 2008

Dear Mayor Brodie and members of Council,

Attached is a letter from Powell River ALERT regarding your application. Please add it to the list of public submissions.

Thank you,  
P R Brown  
Powell River ALERT

March 13, 2008

Mayor Malcolm Brodie and Richmond City Council  
City of Richmond, BC

Dear Mayor Brodie and Councillors,

**Re: Proposed ALR exclusion application  
Garden City Lands, 5555 No 4 Road, Richmond, BC**

Here in Powell River we have recently had considerable community discussion regarding the idea of removing lands from the Agricultural Land Reserve. ALERT was formed as a result of concern about what happens to our ALR lands; triggered by our City Council's request to remove over 800 acres within City boundaries. Over and over again, people expressed their opinion that the intent of the Agricultural Land Reserve policy is even more crucial today than the day it was designed.

We read that you are motivated in your exclusion application by the desire to safeguard lands for Richmond's future. The City of Powell River was motivated by the idea that removing ALR lands could be rezoned for residential development and therefore provide lucrative tax monies for our cash-poor community. We rejected that idea as very short-sighted. Whatever the particular issues of Richmond or Powell River, we are together experiencing a time of huge global shift. Our society has been coasting on the construct of eternal plenty—food, water, oil, whatever we want being available at the beckoning of a truck route or a superstore. This is simply not true anymore.

In BC, despite being a province so blessed with good soil and great weather, we are not growing enough of our own food. In the words of former ALC commissioner, Dave Sands:  
"In BC we are becoming dangerously overly dependent on other countries to supply our food needs. Prime farmland in the USA, where approximately 70% of our imports are grown is being urbanized at over 50 hectares per hour, equivalent to losing our total ALR in less than a decade. The USA is projecting to become a net *food importer* in less than 30 years."

From Richmond all the way up the coast to Powell River, all of us need to secure and plan for a future that will really sustain us--local agriculture. Please keep the Garden City Lands in the ALR.

Yours truly,  
P R Brown

In 2010 Richmond will be on the world stage. The individual and team races on your new indoor arena will be some of the most exciting events in the Winter Olympics and the world will be watching and listening. By now you must be thinking about what you would like the commentators to say about Richmond. It is reported that London's planning for the 2012 Summer Olympics is following Vancouver's lead in addressing social issues more than ever before and that other contenders for future Olympics will have to do the same, so commentators may focus on that.

Those commentators will arrive looking for local colour to fill their blank spots. You can help them but when they go on the air they say what they think. So what would you like them to tell the world? That you have not learned about eco-density yet? That you still build high rise apartments on the best farmland in the world? Or that your policies preserve what is left and to satisfy as much of your food requirements as possible from local sources? And that your ecological policies lead the world in the same way that Canada's athletes will in that arena?

That is what they should be able to tell the world. Policy makers should be able to make those boasts to their constituents everywhere, but particularly in Richmond which was built entirely on that good farmland before we really understood how badly the world needed it. Now we all know. So is there really any question as to whether the Garden City Lands should be forever lost? What you decide will have an impact on me in Vancouver and even on the Londoner on the Clapton bus.

Please be wise.

George Reilly

Vancouver.
