## NOVEMBER 2025 STATISTICS - RICHMOND RCMP

The following information is a limited list of select crime-type samples, which does not comprise the entirety or assortment of all crimes captured by the RCMP. The statistics in this chart should be considered independently of the analysis provided as the data is unrelated to the research provided earlier in this report.

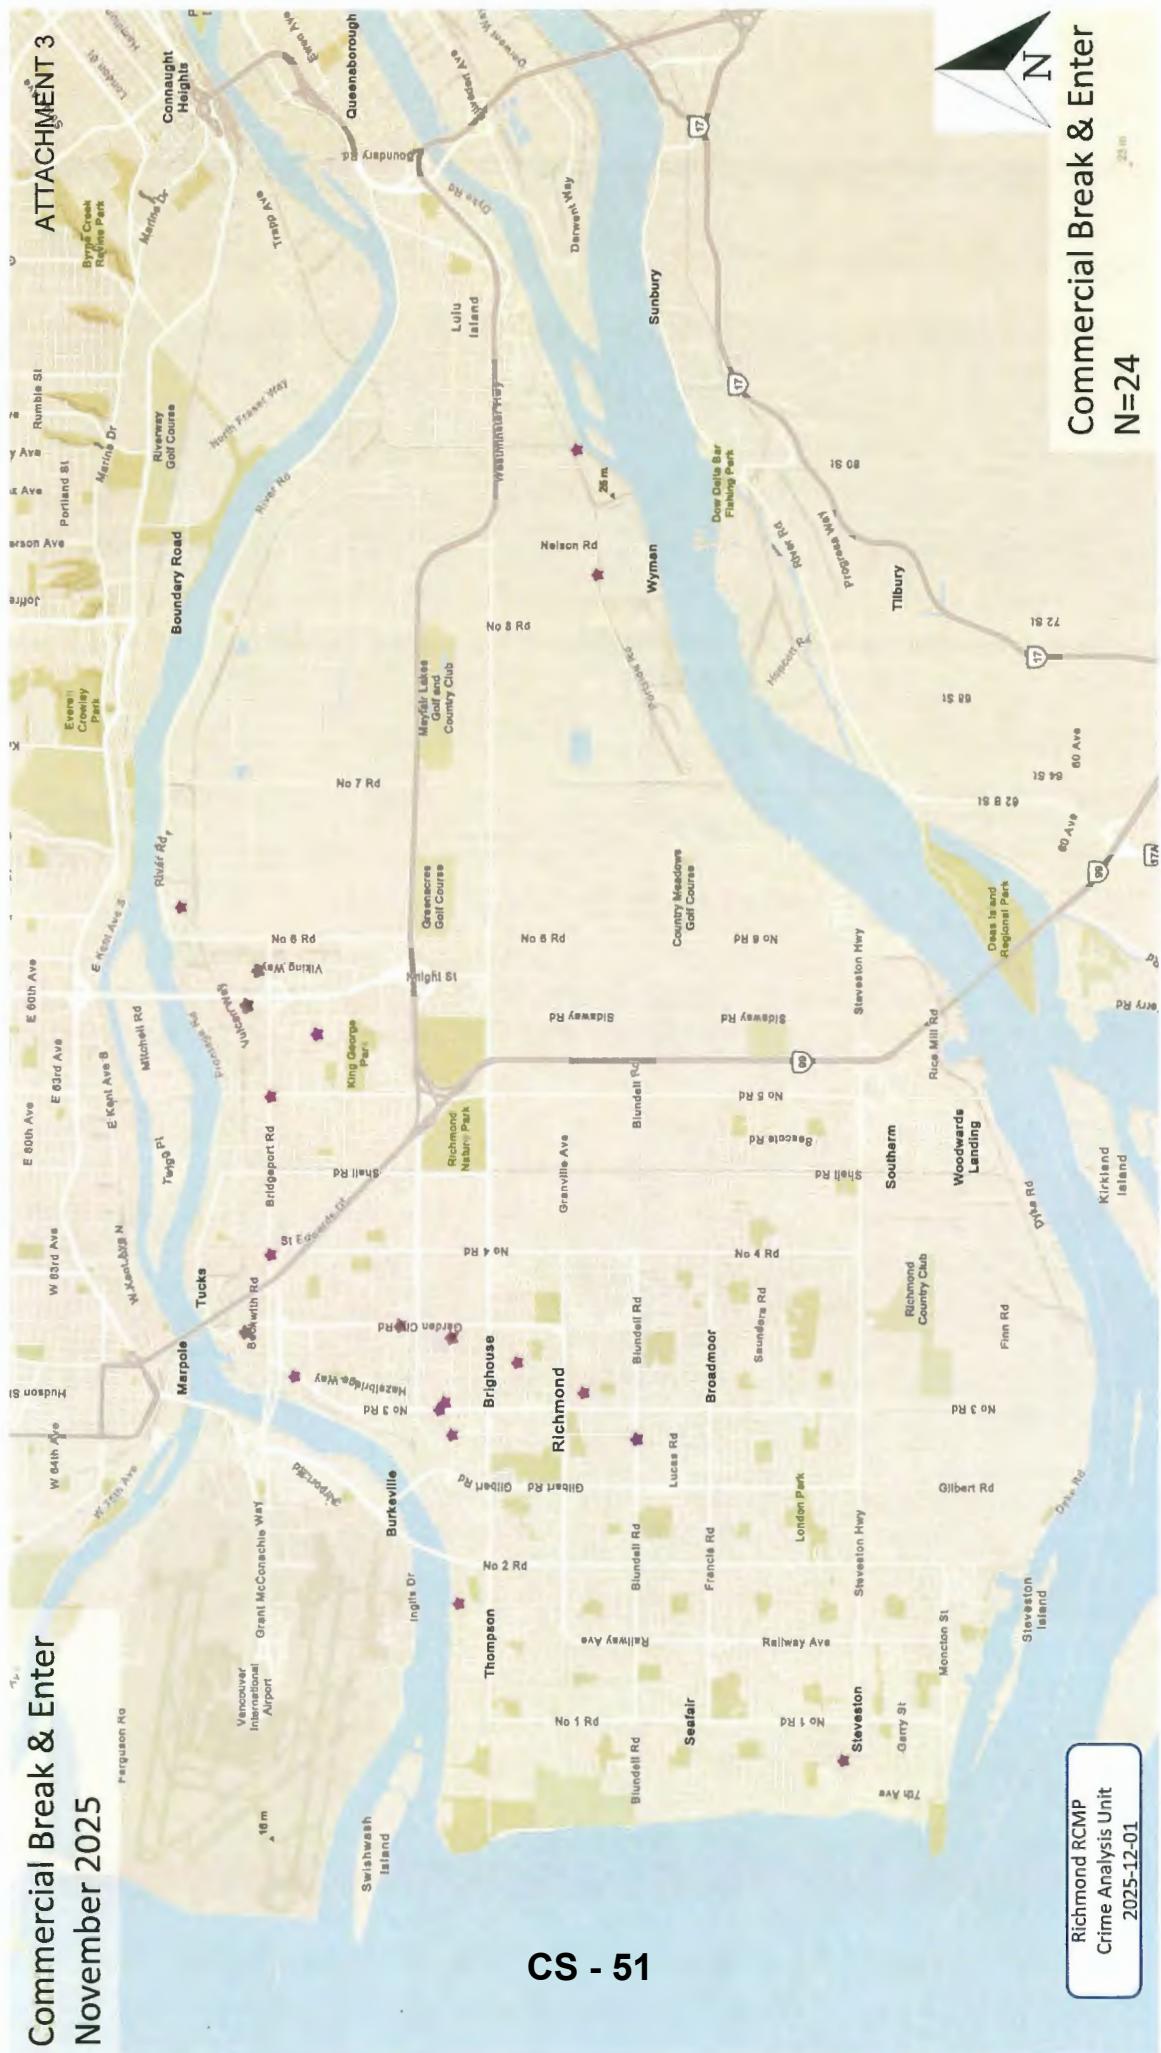

This chart identifies the monthly totals for founded Criminal Code incidents, excluding traffic-related Criminal Code incidents. Based on Uniform Crime Reporting (UCR) scoring, there are three categories: (1) Violent Crime, (2) Property Crime, and (3) Other Criminal Code. Within each category, particular offence types are highlighted in this chart. In addition, monthly totals for Controlled Drugs and Substances Act (CDSA) Incidents and MHA-related calls for service are included. Individual UCR codes are indicated below the specific crime type.

The 5 year average is based on activity within a single month over the past 5 years. If the current monthly total for an offence falls outside the 5 year range (using one standard deviation) due to crime trends, patterns, or spikes, it will be noted in **red** if higher and **blue** if below. If the current monthly total for an offence is above the 5 year range due to primarily non-operational reasons such as the new UCR standards or other scoring issues, the total will be noted in **purple**.
