## Report to Development Permit Panel

**To:** Development Permit Panel

**Date:** March 4, 2015

**From:** Wayne Craig  
Director of Development

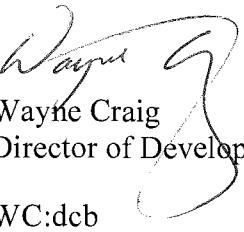

**File:** DP 14-658285

**Re:** Application by Western Gardenia Garden Holdings Ltd. for a Development Permit  
at 7571 and 7591 St. Albans Road

### Staff Recommendation

That a Development Permit be issued which would:

1. Permit the construction of sixteen (16) three storey townhouse units on a consolidated lot including 7571 and 7591 St. Albans on a site zoned "High Density Townhouse (RTH4)"; and
2. Vary the provisions of Richmond Zoning Bylaw 8500 to:
  - a) Reduce the minimum building side yard setback from 4.5 m to 3.9 m at the southeastern corner of the building;
  - b) Increase the maximum bay window projection from 0.6 m to 0.9 m to the south property line adjacent to Jones Road; and
  - c) Allow seven (7) small car parking stalls at the site.

  
Wayne Craig  
Director of Development

WC:dcb

## Staff Report

### Origin

Western Gardenia Garden Holdings Ltd. has applied to the City of Richmond for permission to develop 16 three storey townhouse units at 7571 and 7591 St. Albans Road on a site zoned “High Density Townhouse (RTH4)”. The site currently contains two single family residential homes.

The site is being consolidated and rezoned from “Single Detached RS1/E” to “High Density Townhouse (RTH4)” for this project under Bylaw 9189 (RZ 14-658284). The Bylaw received third reading at the Public Hearing on December 22, 2014.

A Servicing Agreement for offsite improvements (e.g. sidewalks, boulevards, lighting, utility installations, etc) along both Jones Road and St. Albans Road frontages is required prior to Building Permit issuance.

### Development Information

Please refer to attached Development Application Data Sheet (Attachment 1) for a comparison of the proposed development data with the relevant Bylaw requirements.

### Surrounding Development

Development surrounding the subject site is as follows:

To the North: A two and one half storey townhouse development on a lot zoned “Town Housing (ZT45) – Gilbert Road, Acheson – Bennett Sub-Area, St. Albans Sub-Area, South McLennan (City Centre)”.

To the East: A 23 unit three storey townhouse development on a lot zoned “High Density Townhouses (RTH4)”.

To the South: A four storey apartment building on a lot zoned “Medium Density Low Rise Apartments (RAM1)” located on the south-western corner of Jones Road and St. Albans Road. On the south-eastern corner of Jones Road and St. Albans Road is a 3 storey, 10 unit townhouse complex.

To the West: A four storey apartment building on a lot zoned “Medium Density Low Rise Apartments (RAM1)”. General Currie School and park space are located just to the west at 8191 Jones Road/8220 General Currie Road (approximately 400 m away).

### Background

The proposed development site is located at the north-west corner of St. Albans Road and Jones Road in the City Centre area. The consolidated site will be approximately 0.475 acres in size.

The applicant’s proposal is to build a 1,626.36 m<sup>2</sup> (17,506 ft<sup>2</sup> net) medium density, ground-oriented, 3 storey townhouse project on the consolidated lot. The development will contain

16 dwellings ranging in size from 97.5 m<sup>2</sup> (1,054 ft<sup>2</sup>) to 140.5 m<sup>2</sup> (1,512 ft<sup>2</sup>). The units are proposed to be a mix of two, three and four bedroom dwellings. All of the units will have two areas of private outdoor space: at grade and on the proposed elevated podium overtop the parking structure. A 114 m<sup>2</sup> (1,227.09 ft<sup>2</sup>) shared outdoor amenity space will be located on the elevated podium. The parking area will have a common gated vehicle entrance, and each unit having its own garage space with individual garage doors inside the parkade.

Ten of the homes will have direct pedestrian access from either St. Albans Road or Jones Road. Six homes will have pedestrian access from an asphalt walkway that will run along the site's western property boundary leading to Jones Road. A single vehicle access will be provided from Jones Road on the south property line.

The grade of the site will be kept close to the existing grade (i.e. approximately two feet below the adjacent public sidewalk) to facilitate the retention of a row of large trees within the St. Albans and Jones Road frontages partially on the lot and partially on City lands.

### **Related Policies & Studies**

#### Official Community Plan and the St. Albans Sub-Area Plan

The Official Community Plan designates the subject properties as "Neighbourhood Residential" (i.e. areas where the principal uses are single family, two-family and multiple family housing [specifically townhouses]).

The St. Albans Sub-Area of the City Centre, designates the properties for "Multi-Family Low Rise (3 Storey apartments, Townhouses, Two-Family or Single-Family Dwellings)".

The proposed two storey over parking (effectively 3 storey) townhouse development will comply with both the OCP and the St. Albans Sub-Area Plan land use designations.

### **Rezoning and Public Hearing Results**

During the rezoning process, staff identified the following design issues to be resolved at the Development Permit stage:

- Confirmation that the proposed design generally meets the Development Permit guidelines (*the applicant has submitted a complete checklist showing how the guidelines have been addressed – this was submitted to the Advisory Design Panel for review*);
- Ensuring that the landscaping plan addresses all the tree replacement requirements as per the Official Community Plan (*an Arborist's report indicates 21 trees being removed, the landscape plan attached to this application shows 56 new trees to be planted exceeding the OCP's 2:1 replacement criteria*);
- Submission of an acceptable report by a Certified Energy Advisor prior to the formal review by the Development Permit Panel (*a report prepared by DW Energy Advisors has been submitted to the City*);
- Confirmation of the site grading to allow preservation of the retained trees (*The submitted site plan shows grade elevations will be retained in the vicinity of the trees. An Arborist has also been retained and has been working with Parks staff to ensure impacts to the trees to be retained will be minimized*);

- Confirmation of the aging in place and convertible unit elements are incorporated into the Development Permit plans (*aging in place features are shown on the plan sets*); and
- Detailing of all sustainability measures incorporated into the design (*a list of sustainability features proposed is provided later in this report*).

The Public Hearing for the rezoning of this site was held on December 22, 2014. At the Public Hearing, the following concerns about rezoning the property were expressed:

A resident from the south side of St. Albans Road expressed concerns for the anticipated impact upon their views of the mountains, perceived devaluation of their property and effects of construction noise on their personal health.

A resident from an adjacent property to the west raised concerns regarding increases to the existing traffic congestion in the area, obstruction of the skyline and mountain views and infringement on the privacy of adjacent property owners.

#### **Zoning Compliance/Variances (staff comments in bold)**

The proposed scheme attached to this report has satisfactorily addressed the significant urban design issues and other staff comments identified as part of the review of the subject Development Permit application. In addition, it complies with the intent of the applicable sections of the Official Community Plan and is generally in compliance with the “High Density Townhouse (RTH4)” zone except for the zoning variances noted below.

The applicant requests to vary the provisions of Richmond Zoning Bylaw 8500 to:

1. Reduce the minimum building side yard setback from 4.5 m to 3.9 m at the southeastern corner of the building.

*At the southeastern corner of the site the building will be closer to the property line after the required road dedication of a 4 by 4 corner cut adjacent to the St. Albans Road and Jones Road intersection. Staff support the variance as it is a function of the road dedication and will not result in an obstruction to visibility for motorists.*

2. Increase the maximum bay window projection from 0.6 m to 0.9 m at the southern side of the building adjacent to Jones Road.

*Staff support the proposed variance as it will apply only to the upper floor bay windows for 3 units (14D, 15B6 and 16E). The proposed building will be located parallel to St. Albans Road but Jones Road tapers slightly northward as it moves away from the St. Albans Road intersection resulting in the variance. The variance does not impact any pedestrian circulation and provides for additional building articulation along the Jones Road frontage.*

3. Vary the Zoning Bylaw, to allow 7 small car parking stalls at the site.

*Staff support the proposed variance as two of these stalls are considered surplus stalls as the proponent is providing more stalls than required by the Bylaw. Overall, this project will provide 29 parking stalls. The variance is required because the 16 unit development will require less than 31 total vehicle stalls. The Zoning Bylaw allows up to 50% small car stalls if 31 or more stalls are provided. The seven small car stalls proposed represent less than 25% of the overall total number of stalls.*

## Urban Design Response

### *Advisory Design Panel Comments*

The Advisory Design Panel was supportive of the proposed project. A copy of the relevant excerpt from the Advisory Design Panel Minutes from December 18, 2014 is attached for reference (Attachment 2). The design response from the applicant has been included immediately following the specific Design Panel comments and is identified in '***bold italics***'. The applicant has addressed these suggestions to the extent recommended by staff.

### *Conditions of Adjacency*

- Both the form and massing of the proposed development are consistent with the existing surrounding development which is comprised of three and four storey townhouses and apartments.
- Vegetation planting strips are proposed to incorporate a variety of shrubs species along most of the site's perimeter creating a soft edge to the project.
- Six foot high cedar fencing is proposed along both the western and northern property boundaries providing a degree of privacy for adjacent properties and the future owners of this development.
- A total of 7 significant trees are proposed to be protected and retained on this site. Four of these are very large trees located prominently along the south eastern edge of the site. These trees are a significant component of the neighbourhood and their retention is considered an important amenity contribution to the area.
- Dwelling units fronting onto Jones Road or St. Albans have sidewalks leading directly to the street contributing to a more pedestrian friendly streetscapes.
- As the project is located within the City Centre, the standard requirement is typically for a 2.0 m wide public sidewalk and a 1.5 m wide grass and treed boulevard along all road frontages. The public frontage sidewalk will be allowed to meander to minimize impacts upon the trees being preserved. The exact details will be determined through the Servicing Agreement submission at Building Permit stage. Similar meandering is evident across the street along the east side of St. Albans along the frontage of 8399 Jones Road. The grass and tree boulevard in front of the subject site will be adjusted as needed to accommodate the changes in the sidewalk alignment.

### *Site and Functional Planning*

- The vehicle access to the site has been placed as far west as practical to ensure proper clearance from the Jones Road / St. Albans intersection.
- Visitor parking is located adjacent to the entrance to the site and easily located. This parking area also includes one handicapped parking space.
- Individual unit parking garages are all secured with individual garage doors.
- Garbage and recycling areas have been designed to be fully accessible with double doors for easy entry.
- A 1.2 m wide common walkway is proposed along the west side of the complex to provide access to all the units along the western side of the building and also leads to one of the two stair accesses to the upper podium level.

- The podium level provides "at grade" access to the common open space and play areas from the second level all the units. The Advisory Design Panel felt that the use of the upper podium space will serve the residents very well and makes particularly good use of the limited space on the site as a whole. Being raised above the ground level there will be less shading and more natural light for the residents using this area.

#### ***Architectural Form and Character***

- Viewed from the eastern side, the proposed building mass will give the appearance of three buildings with space separations apparent for the second and third floors above the podium level.
- The building massing is articulated by variations in the roof design, the use of gable ends and shed roofing over projected areas. Window and box projections are also employed along the building sides breaking up what would otherwise be large vertical planes.
- At grade, stone veneer finishes, vertical board and batten and solid core doors with glazing elements are proposed. The upper two storey elevations are proposed to include hardie plank siding, board and batten, "Nichiha" architectural block, wood trims and wood fascia. Paint colors include Boothbay Blue, Serape, Smoky Blue for main elements and Natural Tan colors for trims and fascia boards and "Gale Force" gray colors for the vinyl windows. Asphalt shingles are proposed to be a pewter gray color. Extensive glazing is proposed for both the second and third floors. The net result is clear horizontal definition between floors and a distinctive frontage appearance that should fit well with the neighbouring developments.

#### ***Landscape Form and Character***

- This project's design is very much oriented to retention of the significant trees along the Jones Road / St. Albans frontage. These trees will continue to lend a presence for both this project and the community as a whole. An arborist has been retained to ensure that both the on-site and off-site works in the vicinity of the trees will not be detrimental to the survival of these trees.
- The proposed landscape design achieves the required City Centre Area Plan's requirement for an additional 10% landscape area providing a total of  $196 \text{ m}^2$  ( $2,110 \text{ ft}^2$ ) of outdoor landscape area in addition to the standard of  $6.0 \text{ m}^2$  ( $64.59 \text{ ft}^2$ ) per unit landscape area requirements. The total proposed outdoor space area with this design is  $310 \text{ m}^2$  ( $3336.8 \text{ ft}^2$ ).
- Per the Arborist's report (Michael Mills Consulting, dated October 8, 2014) fourteen of the site's 21 trees will be removed. The seven retained trees are large trees in good condition. A total of 56 new trees will be added to the site more than meeting the two for one replacement requirement of the Official Community Plan. Replacement trees will consist of a five varieties of maple trees and a Japanese Stewartia species.
- Significant shrub and ground cover plantings are proposed for the combined at grade and upper podium planting areas. The majority of the 24 species proposed for inclusion are bushy plants and many are flowering varieties.
- Permeable pavers, gravel, Turfpavers and raised wooden boardwalks are used in various locations allowing natural infiltration in areas which might otherwise contain impervious materials. The boardwalks are proposed in areas which might otherwise negatively impact the tree roots of the retained existing trees rather than concrete or asphalt surfaces.

- A 1.8 m (6 ft) foot high cedar fencing is proposed along both the western and northern property boundaries providing a degree of privacy for adjacent properties and the future owners of this development. Fencing materials are proposed to consist of 4x4 posts, 2 x 4 and 1 x 4 horizontal elements.
- An existing swale that runs between the proposed units and the frontage sidewalk from unit 11 to unit 15 is proposed to be enhanced with native and naturalized planting.
- On the upper amenity level the green space includes a bermed planting area for trees, open lawn areas and a children's play area.
- The children's play area is proposed to contain a .9 m (3 ft) wide concrete circular path, resilient play surfaces, a concrete climbing wall with a green-screen arbour and a concrete seating wall for care givers.
- Screens are proposed between unit patios to allow privacy while the bermed planting will be strategically located to give privacy across the courtyard.
- Cedar arbors are located at each unit's entry pathway and at the entrance to the common pathway at the western side of the project.
- In response to the Advisory Design Panel's comments, two feature trees are proposed to be located in flanking positions adjacent to the vehicle entry and the main pedestrian entry off St. Albans Road.
- A landscape security in the amount of \$198,490.26 has been included in the Development Permit Considerations required to be submitted prior to Council review of the application.

### **Parking, Loading and Waste Collection**

- Twenty nine (29) parking stalls are proposed including 18 standard residential parking stalls, 7 small residential stalls and 4 visitor stalls. One of the four outside visitor parking stalls also serves as a handicapped stall.
- Only four stalls (in two units) are in a tandem configuration with all the remaining stalls being either side by side or single car stalls.
- All the interior garages have individual garage doors for security and privacy.
- The project will also provide the required number of Class 1 (20 inside) and Class 2 (4 outside) bicycle stalls. An outdoor bicycle rack is located near the driveway entrance to the project.
- Garbage and food scraps containers are located in an open roof enclosure just to the west of the vehicle entrance. Landscaping and a feature tree will provide screening of the enclosure. A recycling centre is built into the south-west corner of the building. Double doors will allow full access to the facility.
- Registration of a covenant to ensure that the building's main vehicle gate is kept open during the day time to allow the service vehicle to partially enter the parkade to turn around is a requirement of the Development Permit issuance.

### **Crime Prevention through Environmental Design (CPTED)**

- A lighting design will be provided for the project (as indicated in the plan submission) that will provide lighting to common area such as the western pedestrian pathway, each of the entry gates, the open space on top of the podium, the mail box facility and to the two stairways leading to the podium.
- All entrances are visible and overlooked by pedestrians or by neighbour's windows.

- The mail room is located just inside the eastern stairway leading to the upper podium.
- A security gate will prevent access to the parkade area at night time.
- Gates are provided for each unit's entry pathway and to the common pathway along the western side of the site to differentiate the private/semi private space from the public walkways along the street frontages.
- Stairs to the upper podium are gated to the public.
- Each unit's garage is equipped with its own garage door providing security and privacy. The Rezoning Considerations included a covenant to prohibit garages from being converted into habitable space.

### **Accessible Housing**

- The proposed development includes one convertible unit designed with the potential to be easily renovated to accommodate a future resident in a wheelchair. The potential conversion of these units will require installation of a stair mounted wheelchair lift mechanism on each floor. Backing for these mechanisms will be installed during construction.
- All of the proposed units incorporate aging in place features to accommodate mobility constraints associated with aging. These features include:
  - stairwell hand rails;
  - entry doors minimum 855 clear opening
  - hallways minimum 900 mm width
  - one window that can be opened with a single hand in the living room and in one bedroom
  - lever-type handles for plumbing fixtures and door handles; and
  - solid blocking in washroom walls to facilitate future grab bar installation beside toilets, bathtubs and showers.

### **Servicing Agreements/Engineering**

A Servicing Agreement application has not yet been submitted for this project but will be required prior to Building Permit issuance in order for the proposed project to be adequately serviced. The off-site improvements identified through the Rezoning application include a new water service connection, upgrading of the existing storm sewer, replacement of existing inspection chambers, service connections and lawn basins, sidewalk and treed boulevard installations along both St. Albans Road and Jones Road. The exact specifications and alignment well be determined through the forth coming Servicing Agreement.

### **Sustainability**

The applicant has submitted a full Hot 2000 report prepared by DW Energy Advisors (report dated September 24, 2014) which indicates that the project design will achieve the EnerGuide 82 rating and the Architect has advised that all the units will be pre-ducted for solar hot water heating.

In addition to the EnerGuide 82 response, the proponent has identified a number of elements they proposed to incorporate into the development to improve the overall sustainability of the project including:

- construction of a landscaped roof and open space over portions of the parkade;

- preservation of on-site mature trees (the building design and Flood Construction Level [FCL] have been adjusted to preserve these trees);
- low V.O.C. paints on interior spaces;
- use of durable, low maintenance surfaces on building exteriors;
- locating buildings and windows to maximize natural light and ventilation;
- use of permeable surfaces wherever possible (e.g., interlocking grass pave at the visitor parking area);
- the buildings are located and windows placed to maximize natural light and ventilation;
- incorporating "energy star" appliances and light bulbs in each unit; and
- use of drought tolerant and native plants plus high efficiency climate-based irrigation systems are proposed within the site's landscaping.

### Conclusions

The proposed 16 unit townhouse project for the north-western corner of St. Albans and Jones Road has been well thought out, well designed and should be an attractive complement to the surround developments. The project has place considerable emphasis on the preservation of existing mature trees and commitments have been made to ensure the highest possibility of their survival. Staff recommend approval of the application by Western Gardenia Garden Holdings Ltd. for the proposed Gardenia Gardens project at 7571 / 7591 St. Albans Road.

David Brownlee  
Planner 2

DCB:cas

The following are to be met prior to forwarding this application to Council for approval:

- Final adoption of the Zoning Amendment Bylaw No. 9189.
- Registration of a legal agreement on title requiring the main parkade gate to remain open or unlocked during daytime (7:00 am to 7:00 pm) hours to allow service vehicle to turn around in the complex; and
- Receipt of a Letter-of-Credit for landscaping in the amount of \$198,490.26.
- Installation of appropriate tree protection fencing around all trees to be retained as part of the development prior to any construction activities, including building demolition, occurring on-site.
- Registration of a legal agreement on title ensuring that car stalls in a tandem arrangement are assigned to the same dwelling unit.

Prior to future Building Permit issuance, the developer is required to complete the following:

- The applicant is required to obtain a Building Permit for any construction hoarding associated with the proposed development. If construction hoarding is required to temporarily occupy a street, or any part thereof, or occupy the air space above a street or any part thereof, additional City approvals and associated fees may be required as part of the Building Permit. *For further information on the Building Permit, please contact Building Approvals Division at 604-276-4285.*
- Incorporation of accessibility measures in Building Permit (BP) plans as determined via the Rezoning and/or Development Permit processes.
- Submission of a construction traffic and parking management plan to the satisfaction of the City's Transportation Division (<http://www.richmond.ca/services/ttp/special.htm>).
- If applicable, payment of latecomer agreement charges associated with eligible latecomer works.

### **Excerpt from the Minutes from The Design Panel Meeting**

**Wednesday, December 18, 2014 – 4:00 p.m.  
Rm. M.1.003  
Richmond City Hall**

**CARRIED**

#### **1. DP 14-658285 - 16 THREE-STOREY TOWNHOUSES**

**APPLICANT:** Western Gardenia Garden Holdings

**Ltd. PROPERTY LOCATION:** 7571 and 7591 St. Albans

#### **Road Applicant's Presentation**

Architect Wayne Fougere, Fougere Architecture Inc., and Landscape Architect Daryl Tyacke, ETA Landscape Architecture Inc., presented the project and answered queries from the Panel on behalf of the applicant.

#### **Panel Discussion**

*Comments from the Panel were as follows:*

- like the project; applicant used a different approach for the type of site where the subject development is located; lifting the plane one level up is beneficial to residents, e.g. more daylight exposure and privacy of outdoor amenity area;  
*No Comment*
- appreciate the proposed materials and contemporary approach to the architecture; however, the three garbage and recycling elements on the ground floor are spread out; consider integrating these elements to enhance the appearance of the entry to the proposed development;  
*Please refer to attached letter from property Management Company that confirms separating garbage and recycling causes no problem for the residents and operators who are handling the pick-up.*
- Good project; applicant gave attention to details to ensure that the proposed development fits well into the neighbourhood;  
*No Comment*
- appreciate the quality of glazing; however, consider introducing opaque elements into the bay window to minimize the energy impact to the proposed development;  
*Based on the proposed window design, we will achieve Energuide 82.*

- like the design of the convertible unit; appreciate the pocket door in the ensuite bathroom on the upper floor; also consider a pocket door for the powder room on the main floor in lieu of a swinging door;  
*There are not enough side walls for switching to a pocket door in the powder.*
- consider enlarging the transfer areas for the chair lift;  
*The circulation of the stair lift has been revised.*
- consider a future location for a vertical lift in the convertible unit; look at the parking space on the ground floor adjacent to the living area as a potential location;  
*There is not enough space in the garage to provide a vertical lift.*
- consider locating the laundry on the same floor as one of the bedrooms; also consider introducing a PVC pipe to facilitate the transport of things from the upper floor to other floors/areas in the convertible unit;  
*We explored various options but in the end prefer laundry on the main floor. Please see attached plan# 15.*
- a successful project from a landscape perspective;  
*No Comment*
- garbage and recycling elements at the entry point on grade need further design development; could be shifted and clustered together; also consider bigger and taller plant materials to soften the frontage and provide more screening;  
*Please refer to attached letter from property Management Company that confirms separating garbage and recycling causes no problem for the residents and operators who are handling the pick-up. We explored various options and the proposed approved by Recycling and Garbage staff.*  
*Feature trees added at the entry. Please see attached plan#3b.*
- introduction of TurfPave is an innovative approach for the grassed area on the podium; however, minimize its use and introduce pavers and/or stepping stones so that residents can avoid walking on wet ground during rainy days; also consider a regular lawn in lieu of TurfPave in some areas;  
*Because the area is so small, the potential for excessive wear and tear on the turf seemed great. As a means of minimizing damage to it, the decision was made to use TurfPave throughout. Maintenance will be easier with reduced compaction requiring aerating.*  
*Paving stones have been added across the amenity garden connecting the two staircases*

- appreciate the planting islands on the courtyard which provide screening for townhouse units from other units directly across; consider introducing green screen for exposed units;

*No Comment*

- appreciate the form and landscaping of the proposed development; like the materiality and finishes; appreciate the different approach for the outdoor amenity space; applicant was able to fit in a lot in a tight site; however, ensure adequate lighting at the narrow stairs to address potential CPTED concerns;

*The distance between two buildings is 6' and the stairs end up to open area at each end with adequate light and they will be gated to the public and used by the residence only.*

- the project is well-designed and efficient;

*No Comment*

- consider further design development to garbage and recycling;

*We explored various options and the proposed approved by Recycling and Garbage staff.*

- ensure adequate lighting at the internal drive aisle; explore innovative ways to introduce natural lighting;

*In our opinion the addition of daylighting into the drive aisle, other than that already afforded by the open ends, will be ineffectual. The level of lighting required in these spaces even during the day will far exceed that provided by light tubes, for example. The small amount of natural light entering the parkade will not be noticed above the ambient artificial light. The only way to make an impact would be to open large areas of the parkade roof- minimizing an already tight amenity space above.*

- applicant is encouraged to introduce public art in the proposed development; public art pieces could be integrated at the outdoor amenity space on podium level;

*The client is going to cash-in-Lieu.*

- appreciate the raised podium; provides parking and adequate outdoor amenity space in a tight site; a good precedent for future projects on a similar site;

*No Comment*

- appreciate the forms, roofs and cross sections; however, the architecture appears plain and confused as it is a mix of heritage and modern architecture; consider a more unique and modern architecture to make it more exciting;

*Exterior design blends traditional and modern elements so as to provide interest while maintaining local flavor.*

- applicant should pay more attention to the entry sequence on grade; look at opportunities to reorganize; agree with comment to explore the possibility of planting bigger and taller trees at the frontage and utilizing structural soil cells; should consider a specimen tree to pay homage to the fir tree to be removed;

*Feature trees added at the site entry.*

- look at synergy and efficiency of garbage and recycling lay-outs; and  
*Please refer to attached letter from property Management Company that confirms separating garbage and recycling causes no problem for the residents and operators who are handling the pick-up.*
- good approach for a tricky site; applicant needs to address potential CPTED issues, e.g. lighting at the internal drive aisle and security for vehicle entrance gate.  
*At the BP stage, electrical engineer will design lighting that provides a well illuminate drive aisle.*

### **Panel Decision**

It was moved and seconded

***That DP 14-658285 be supported to move forward to the Development Permit Panel subject to the applicant giving consideration to the comments of the Panel.***

**CARRIED**

# City of Richmond

## Development Permit

No. DP 14-658285

To the Holder: Western Gardenia Garden Holdings Ltd.

Property Address: 7571 and 7591 St. Albans Road

Address: 202 – 2425 Quebec Street  
Vancouver, BC V5T 4L6

1. This Development Permit is issued subject to compliance with all of the Bylaws of the City applicable thereto, except as specifically varied or supplemented by this Permit.
2. This Development Permit applies to and only to those lands shown cross-hatched on the attached Schedule "A" and any and all buildings, structures and other development thereon.
3. The "Richmond Zoning Bylaw 8500" is hereby varied to:
  - a. Reduce the minimum building side yard setback from 4.5 m to 3.9 m at the southeastern corner of the building;
  - b. Increase the maximum bay window projection from 0.6 m to 0.9 m at the southern side of the building adjacent to Jones Road; and
  - c. Vary the Zoning Bylaw, to allow seven (7) small car parking stalls at the site.
4. Subject to Section 692 of the Local Government Act, R.S.B.C.: buildings and structures; off-street parking and loading facilities; roads and parking areas; and landscaping and screening shall be constructed generally in accordance with Plans #1 to #28 attached hereto.
5. Sanitary sewers, water, drainage, highways, street lighting, underground wiring, and sidewalks, shall be provided as required.
6. As a condition of the issuance of this Permit, the City is holding the security in the amount of \$198,490.26 to ensure that development is carried out in accordance with the terms and conditions of this Permit. Should any interest be earned upon the security, it shall accrue to the Holder if the security is returned. The condition of the posting of the security is that should the Holder fail to carry out the development hereby authorized, according to the terms and conditions of this Permit within the time provided, the City may use the security to carry out the work by its servants, agents or contractors, and any surplus shall be paid over to the Holder. Should the Holder carry out the development permitted by this permit within the time set out herein, the security shall be returned to the Holder. The City may retain the security for up to one year after inspection of the completed landscaping in order to ensure that plant material has survived.
7. If the Holder does not commence the construction permitted by this Permit within 24 months of the date of this Permit, this Permit shall lapse and the security shall be returned in full.

To the Holder: Western Gardenia Garden Holdings Ltd.

Property Address: 7571 and 7591 St. Albans Road

Address: 202 – 2425 Quebec Street  
Vancouver, BC V5T 4L6

---

8. The land described herein shall be developed generally in accordance with the terms and conditions and provisions of this Permit and any plans and specifications attached to this Permit which shall form a part hereof.

This Permit is not a Building Permit.

Tree Management Plan  
Plan

Logo

Notes:  
1. Trees that cannot be replaced at the required 2:1 ratio  
will require a cash-in-lieu arrangement will need to be made  
between the city and developer  
2. Refer to tree management plan prepared by Michael Mills  
Consulting, dated Oct 08, 2014 for details, tree inventory  
and assessment.  
3. Root pruning by project arborist is required during site  
preparation.

as per layout plan										

**Plant List**

ID	Qty	Botanical Name	Common Name	Scheduled Size Remarks
<b>TREES</b>				
Ac	27	Acer circinatum	Vine Maple	2.5m; WB full bushy plants
Aq	4	Acer griseum	Paperbark Maple	1.5m full height full bushy plants
Abs	7	Acer palmatum 'Seiryu'	Japanese Maple	5cm cal. B&B full bushy plants
Ar	7	Acer rubrum 'Red Rocket'	'Red Rocket' maple	7cm cal. 2m standard
Aro	4	Acer rubrum 'October Glory'	October Glory Red Maple	6cm Cal 2m STD. B&B
Stps	7	Spiraea pseudocamellia	Japanese Stewartia	4m h/ B&B multistemmed
<b>SHRUBS</b>				
Ah	1938	Anemone x hybrida 'Honoring Jobert'	Japanese anemone 'Honoring Jobert'	#1 cont. Bermed planting - ensures min. 6 cubic meters of soil volume per tree
Alp	51	Azalea latifolia 'purple splendor'	Evergreen Azalea	#2 cont. Professional Soil
Bc	248	Berberis cordifolia 'Bressingham White'	Heartsleaf Bergenia	#1 cont. full bushy plants
Camf	19	Cornus alba 'Midwinter fire'	Midwinter Fire Dogwood	#3 cont. full/bushy
Cos	21	Corinus sericea	Red osier Dogwood	#3 cont. full bushy plants
Fa	599	Fraxinus x ornata	Strawberry	SP24 full bushy plants
Hbc	30	Hosta x 'Blue Cadet'	Blue Cadet Plantain Lily	#2 cont. TurfPave - Interlocking grass paver for pedestrian circulation
Heh	72	Heliotropus X hybridus 'Royal Heritage strain'	Royal Heritage strain lantern rose#2 cont	#1 cont. Clip concrete edger - flush with bollards and interlocking grass paver
Hg	40	Heuchera glabra	Green Carpet / Rupturewort	#1 cont. Privacy screen - see Architectural drawings for details
Hha	72	Hosta plantaginea 'Aphrodite'	Aphrodite Plantain Lily	#2 cont. full bushy plants - concrete unit pavers
If	331	Iris sibirica 'flavivittatis'	Blue Star Creeper	#1 cont. staked
Iv	19	Iris versicolor	blue flag iris	#2 cont. full bushy plants
Jue	1423	Juncus effusus	common rush	#1 cont. 3m o.c. full bushy plants
Lah	74	Lavandula angustifolia 'Hidcote Blue'	Hidcote Blue Lavender	#2 cont. full bushy plants
Ls-1	331	Leptinella squarrosa	green brass buttons	#1 cont. full bushy plants
Ps	30	Polygonatum multiflorum	Alaska fern	#2 cont. full bushy plants
PAK	39	Rhododendron 'Anat Kruschke'	Rhododendron (pink)	#1 cont. full bushy plants
Sh	28	Sarcococca hupehensis	Sweet Box	#2 cont. full bushy plants
Sr	20	Sarcococca ruscifolia	Fragrant Sarcococca	#3 cont. full bushy plants
The	13	Taxus x media 'Hicksii'	Eddie grey	1.5m B&B full bushy plants
Tmh	123	Taxus media 'Hicksii'	Anglojap Yew	1.2m B&B full bushy plants
Tyl	159	Taxus laurifolia	catalpa	#1 cont. full bushy plants
Wya	4	Vitis vinifera atropurpurea	Purple Leaf Grape	#2 cont/ staked full bushy plants
