

City of Richmond

Report to Committee

To: Public Works & Transportation Committee
From: Victor Wei, P. Eng.
Acting Director, Transportation

To Public Works & Transportation
Date: July 9, 2004 - Aug 25, 2004
File: 01-0100-20-CCNT1-
01/2004-Vol 01

Re: **CITY CENTRE NORTH TRANSIT AND TRANSPORTATION TASK FORCE - FINANCIAL IMPLICATIONS OF RECOMMENDATIONS AND REQUESTS**

Staff Recommendation

1. That the 29 recommendations and Requests No. 2 and 3 of the City Centre North Transit and Transportation Task Force, as outlined in Attachments 1 and 2 of the attached report respectively, be endorsed with the understanding that in implementing these recommendations and requests:
 - a) no further funding is required from the current City capital and operating budgets; and
 - b) any requirement for future capital and operating funding shall be subject to the annual budget review by Council.
2. That Request No. 1 from the City Centre North Transit and Transportation Task Force, as outlined in Attachment 2 of the attached report, be considered as a separate item in Council's future review of the City Pay Parking Program and operating budget.

REVIEWED BY CAO	YES <input checked="" type="checkbox"/>	NO <input type="checkbox"/>

Staff Report

Origin

At the May 25, 2004 regular Council meeting, Council directed staff to review and report back on the final recommendations of the City Centre North Transit and Transportation Task Force with reference to the financial implications to the City of endorsing the recommendations.

Specifically, the referral states that:

Prior to the question on Resolution No. R04/10-30 being called, staff were requested to examine 'funding fundamentals' as they relate to the proposed recommendations, and report to the Finance Select Committee.

This report provides further detail of these expected financial implications.

Analysis

1. Task Force Recommendations (Attachment 1)

Staff and Task Force members, with input from TransLink, Coast Mountain Bus Company and other agency staff, jointly developed 29 recommendations to address traffic, parking and transit issues in the City Centre north area. These recommendations are comprised of 19 short-term recommendations (potential implementation within approximately one year) and 10 long-term recommendations (potential implementation in approximately one to three years).

Attachment 1 lists each recommendation and identifies the financial impact to the City if the recommendation is implemented. It should be noted that endorsement of the Task Force recommendations at this stage does not commit the City to funding their implementation. Implementation of each recommendation would be subject to further Council approval through the annual capital and operating budget process or specific Council approval of programs, if additional funding is required beyond the current approved capital and operating budgets.

2. Task Force Requests to City (Attachment 2)

In addition to its recommendations, the Task Force also identified three approaches for the City to employ to help facilitate the implementation of some of the recommendations. The Task Force submitted these suggested approaches as requests to the City that are separate from its recommendations.

Attachment 2 lists each request and identifies the financial impact to the City if the requested approach is implemented. Except for Request No. 1, endorsement of the requests does not bind the City to any financial commitment. With specific reference to Request No. 1 for the allocation of net pay parking revenues generated in the City Centre north area to support the recommended road, parking and pedestrian improvements, it has not been a City practice to utilize operating revenue (such as pay parking revenue) to substantially fund the implementation of road capital improvements. Nor it has been a City policy to pre-determine the specific use of any general revenue stream. However, Council will have the opportunity to consider this request as part of its review of the City Pay Parking Program and future annual operating budget plans.

Financial Impact

As summarized in Attachments 1 and 2, the only immediate financial impact to the City of the Task Force's recommendations and requests recommended for endorsement is the extension of Browngate Road, which will be implemented in 2004 per Council approval of the 2004 Capital Program. Other capital projects such as signal and pedestrian facility improvements would be funded from the City's annual Capital Program, which is subject to Council approval. Other recommendations not related to capital improvements could be accommodated within existing staff resources and departmental programs. The establishment of the Richmond Parking Advisory Committee will result in some overtime costs due to staff attendance at Committee meetings outside of regular work hours which can be absorbed within the current approved operating budget.

Conclusion

Both Task Force members and staff support endorsement of the recommendations in Attachment 1 and Requests No. 2 and 3 in Attachment 2 of this report, which all complement and enhance the *City Centre Transportation Plan*. Council endorsement of these recommendations and requests will not bind the City to any financial commitments. Request No. 1 from the Task Force can be considered separately by Council as part of its review of the City Pay Parking Program and future operating budgets.
