

Development Permit Panel

Council Chambers, City Hall
6911 No. 3 Road

Wednesday, October 15, 2014
3:30 p.m.

Minutes

Motion to adopt the minutes of the Development Permit Panel meeting held on Wednesday, September 24, 2014.

1. Development Permit 14-667441
(REDMS No. 4315296)

APPLICANT: Polygon Jayden Mews Homes Ltd.

PROPERTY LOCATION: 9700 and 9740 Alexandra Road

Director's Recommendations

That a Development Permit be issued which would:

- 1. permit the construction of 64 townhouses at 9700 and 9740 Alexandra Road on a site zoned "Town Housing (ZT71) – Alexandra Neighbourhood (West Cambie)"; and*
- 2. vary the provisions of Richmond Zoning Bylaw 8500 to increase the maximum percentage of enclosed vehicle parking spaces provided in a tandem arrangement to 57%.*

2. New Business

3. Date of Next Meeting: Wednesday, October 29, 2014

ITEM

4. Adjournment

**Development Permit Panel
Wednesday, September 24, 2014**

Time: 2:30 p.m.
Place: Council Chambers
Richmond City Hall
Present: Joe Erceg, Chair
Robert Gonzalez, General Manager, Engineering and Public Works
Dave Semple, General Manager, Community Services

The meeting was called to order at 2:30 p.m.

1. Minutes

It was moved and seconded

That the minutes of the meeting of the Development Permit Panel held on Wednesday, September 10, 2014, be adopted.

CARRIED

2. Development Permit 14-662829

(File Ref. No.: DP 14-662829, Xr: HA 14-662831) (REDMS No. 4336656)

APPLICANT: City of Richmond

PROPERTY LOCATION: 3811 Moncton Street

INTENT OF PERMIT:

1. Permit the rehabilitation of the exterior of the Japanese Fishermen's Benevolent Society Building, a designated Heritage Building, in order to alter the south façade of the building at 3811 Moncton Street on a site zoned Steveston Commercial (CS2); and
2. Issue a Heritage Alteration Permit for 3811 Moncton Street in accordance with Development Permit (HA 14-662831).

Development Permit Panel

Wednesday, September 24, 2014

Applicant's Comments

Wendy Andrews, Andrews Architects Inc., gave a brief overview of the proposed application regarding (i) urban design, (ii) architectural form and character, and (iii) landscape and open space design.

Ms. Andrews spoke of the proposed exterior modifications to the buildings on the subject site, noting that a concrete deck and a sloped walkway will be installed. Also, she noted that the patio area will be modified and enlarged to remove any drop-offs and provide for more programming space. She added that the exterior fencing will integrate with the design of the buildings.

Ms. Andrews advised that the current front doors will be replaced with wood panel doors and that the new lighting elements will integrate with the design of the buildings.

Panel Discussion

In reply to queries from the Panel, Ms. Andrews advised that (i) the exterior replacement doors for the Steveston Museum will be wood panel doors that would integrate well with the building's heritage character, (ii) the concrete connection between the two buildings will not be modified, and (iii) the concrete patio will be expanded.

In reply to queries from the Panel, Ms. Andrews noted that the proposed modifications would reflect the heritage nature of the buildings and would replace some of the modern elements installed previously.

Staff Comments

Wayne Craig, Director, Development, advised that the proposed application was reviewed and endorsed by the Richmond Heritage Commission.

Correspondence

None.

Gallery Comments

None.

Panel Discussion

Discussion ensued with regard to preserving the heritage nature of the buildings.

Development Permit Panel
Wednesday, September 24, 2014

Panel Decision

It was moved and seconded

1. *That a Development Permit be issued which would permit the rehabilitation of the exterior of the Japanese Fishermen's Benevolent Society Building, a designated Heritage Building, in order to alter the south façade of the building at 3811 Moncton Street on a site zoned Steveston Commercial (CS2); and*
2. *That a Heritage Alteration Permit be issued for 3811 Moncton Street in accordance with Development Permit (HA 14-662831).*

CARRIED

3. New Business

4. Date Of Next Meeting: Wednesday, October 15, 2014

5. Adjournment

It was moved and seconded

That the meeting be adjourned at 2:40 p.m.

CARRIED

Certified a true and correct copy of the Minutes of the meeting of the Development Permit Panel of the Council of the City of Richmond held on Wednesday, September 24, 2014.

Report to Development Permit Panel

To: Development Permit Panel

Date: September 24, 2014

From: Wayne Craig
Director of Development

File: DP 14-667441

Re: Application by Polygon Jayden Mews Homes Ltd. for a Development Permit at
9700 and 9740 Alexandra Road

Staff Recommendation

That a Development Permit be issued which would:

1. Permit the construction of 64 townhouses at 9700 and 9740 Alexandra Road on a site zoned "Town Housing (ZT71) – Alexandra Neighbourhood (West Cambie)"; and
2. Vary the provisions of Richmond Zoning Bylaw 8500 to increase the maximum percentage of enclosed vehicle parking spaces provided in a tandem arrangement to 57%.

Wayne Craig
Director of Development

WC:dcb

Staff Report

Origin

Polygon Jayden Mews Homes Ltd. has applied to the City of Richmond for permission to develop 64 three-storey townhouses at 9700 and 9740 Alexandra Road on a site zoned “Town Housing (ZT71) – Alexandra Neighbourhood (West Cambie)”. Portions of both properties are designated as Environmentally Sensitive Areas under the Official Community Plan (OCP).

The site is being consolidated and rezoned from “Two-Unit Dwellings (RD1)” and “Single Detached (RS1/F)” to “Town Housing (ZT71) – Alexandra Neighbourhood (West Cambie)” for this project under Bylaw 9159 (RZ 13-649641).

A separate Servicing Agreement to address frontage improvements along both Alexandra Road and Alderbridge Way is a condition of Rezoning adoption. These improvements will include, but are not limited to:

- Raising the Alexandra Road surface to approximately 2.0 m;
- The installation of concrete sidewalks or pathway trails;
- On-street parking on Alexandra Road;
- New light standards along the south side of Alexandra Road;
- Infill planting within the centre median along Alderbridge Way; and
- The upgrading and/or replacement of existing sanitary lines, storm lines, watermain lines, additional fire hydrants and the undergrounding of hydro lines.

Development Information

The developer proposes to construct 13 buildings containing 64 individual townhouse units on the consolidated property. As proposed, the buildings will reflect a Tudor split timber style with variations in the colour schemes and accent trims to differentiate the buildings.

The individual townhouse units are proposed to range in size from 126.2 m² (1,358.5 ft²) to 152.0 m² (1,636.3 ft²) each accommodating three bedrooms. Approximately 40% of the townhouses will have direct walkway connections to a meandering landscaped pathway that runs through the site. Units fronting onto Alexandra Road will also have individual gates and sidewalks to the frontage sidewalk.

The proposed site layout includes a 213.9 m² (2,302 ft²) two-storey amenity building with an adjacent children’s play area. A large common green space is proposed in the southern half of the site which will serve as an open space for outdoor recreation and informal gathering and is consistent with OCP guidelines for amenity areas. It will incorporate original, visible artworks that will also function as habitat for barn owls that are known to frequent the area. An existing large conifer tree near the centre of the site is proposed to be retained and augmented with landscaping and an outdoor seating area for residents.

The site’s primary vehicle access will be from Alexandra Road with a controlled ‘emergency vehicle only’ access to Alderbridge Way.

Please refer to the attached Development Application Data Sheet (Attachment 1) for a comparison of the proposed development data with the relevant Bylaw requirements.

Background

Development surrounding the subject site is as follows:

- To the North: At 9566 Tomicki Avenue, is an existing 26 building three-storey townhouse development (known as Wishing Tree) containing 141 units [zoned “Town Housing (ZT67) – Alexandra Neighbourhood (West Cambie)” (DP 08-432203)].
- To the East: Six large residential lots (9800 and 9820 Alexandra Road and 4711–4771 No. 4 Road) all zoned “Single Detached (RS1/F)”. The West Cambie Area Plan identifies the area containing these Single Detached lots as “Residential Area 2” permitting two- and three-storey Townhomes. Redevelopment of these lots in the future is likely but no applications have been received to time of writing.
- To the South: Alderbridge Way and the Garden City lands (5555 No. 4 Road) to the south. The 55 ha. (136.5 ac.) Garden City lands are zoned “Agriculture (AG1)”.
- To the West: Five large residential lots (9580–9680 Alexandra Road) currently zoned “Single Detached (RS1/F)” and/or “Two-Unit Dwellings (RD1)”. All five lots are included in a Rezoning application (RZ 13-649999) by Am-Pri Developments (2012) Ltd. which proposes to develop approximately 96 three-storey townhouse units on the consolidated property.
- Further west, between May Drive and Garden City Road is the proposed First Richmond North Shopping Centre (Smart Centres) (RZ 10-528877 – approved July 28, 2014).

Rezoning and Public Hearing Results

During the rezoning process, staff identified the following design issues to be resolved at the Development Permit stage:

- Confirmation of the site plan in relation to the Zoning Schedule (ZT71), detailing building massing and design, provision of parking, loading, pedestrian access, amenity areas, surface permeability, incorporation of play areas, etc.; (*Staff have worked with the applicant to ensure these have been addressed in the design plans.*)
- Details on the existing vegetation, ESA mitigation, compensation and long-term maintenance plan preparation and protection; (*Compensation has been provided through both planting and a cash contribution. A detailed maintenance plan has been submitted to address the long term management of the ESA strips and the non-ESA planted areas.*)
- Addressing drainage concerns in the corridor between this site and the site to the west; (*A drainage channel is being provided and coordinated between the two developments. Grades between the two sites will essentially be the same so no new drainage issues will be created.*)

- Registration of any legal agreements related to the protection and maintenance of the ESA vegetation areas; (*Included in the DP Considerations attached to the report.*)
- Confirmation of the Public Art response; (*Atelier Anon has been selected by the Public Art Jury through an invited call process.*)
- Resolving on-site garbage collection and ensuring appropriate vehicle movement; (*The applicant worked with staff to address these elements. Door to door pickup will be provided for this site.*)
- Incorporation of appropriate Aircraft Noise Mitigation measures in the building plans; (*An acoustical report has been submitted and the proponent has committed to incorporating the recommendations into the development which will be reviewed by the Building Department.*)
- A variance will be required to accommodate the number of tandem stalls proposed; (*A variance is requested to increase the number of tandem stalls permitted. The variance also helps with the provision of vegetation strips along three sides of the site. Details of the variance request are discussed later in this report*)
- Addressing accessibility features within the units; (*14 convertible units are proposed. Accessibility features [i.e. stairwell hand rails, lever type handles for all plumbing fixtures and door handles, solid blocking in all washroom walls to facilitate future grab bars] will be included in all the units.*) and;
- Greater definition of the sustainability measures. (*An expanded list of the development's proposed sustainability features, including the developer's commitment to achieve Energuide 82, is provided later in this report*).

The Public Hearing for the rezoning of this site was held on September 2, 2014. At the Public Hearing, the following concerns about rezoning the property were expressed:

The owner of 9800 Alexandra Road raised concern about potential negative impacts due to construction activities (i.e. dust, noise, settlement of adjacent properties, etc.) and the potential to connect to the City's sewer system. The Director of Development addressed these issues at the Hearing noting that the City has programs in place to ensure roads are kept clean throughout construction activities and requiring geotechnical reports to adjacent properties as part of the Building Permit process. The Director also commented on the potential to connect to the City's sewer system. No further issues were identified during the Public Hearing.

Staff worked with the applicant to address these issues in the following ways:

Both Development Applications staff and the applicant have been alerted to Mr. Sihota's comments regarding a desired sanitary connection and will review this in greater detail through the Servicing Agreement design and approval process. If a sanitary connection is possible staff note its construction would be at Mr. Sihota's cost and that it may also be subject to a latecomer charge.

Staff Comments

The proposed scheme attached to this report has satisfactorily addressed the significant urban design issues and other staff comments identified as part of the review of the subject Development Permit application. In addition, it complies with the intent of the applicable sections of the Official Community Plan and is generally in compliance with the "Town Housing

(ZT71) – Alexandra Neighbourhood (West Cambie)” zoning except for the zoning variance noted below.

Zoning Compliance/Variations (staff comments in **bold**)

The applicant requests to vary the provisions of Richmond Zoning Bylaw 8500 to increase the maximum percentage of enclosed vehicle parking spaces provided in a tandem arrangement to 57%.

(Staff supports the proposed variance as the increase results in only 4 additional units containing tandem stalls over what is normally permitted, as the resulting reduction in the unit width will help to provide a slightly wider vegetated buffer along Alderbridge Way particularly at the southwestern corner of the site. This site does not abut single-family neighbourhoods and the higher percentage of tandem spaces should not create overflow parking issues on nearby streets. The proposed variance is in line with other townhouse developments in the area that incorporate tandem parking. Staff also note that the overall amount of parking being provided at this site exceeds the Zoning Bylaw requirement.)

Advisory Design Panel Comments

The Advisory Design Panel is supportive of the project. A copy of the relevant excerpt from the Advisory Design Panel Minutes from July 23, 2014 is attached for reference (Attachment 2). The design response from the applicant has been included immediately following the specific Design Panel comments and is identified in ‘**bold italics**’.

Analysis

Conditions of Adjacency

- The proposed development site is located in the Alexandra Neighbourhood between Alexandra Road and Alderbridge Way. There are existing townhouses along the north side of Alexandra Road, proposed townhouses immediately to the west (AmPri application RZ 13-649999) and potential for redevelopment of all the lots along No. 4 Road to the east to townhouses.
- The proposed development will be of similar height and massing as the existing townhouses to the north and to the west and will generally conform to the neighbourhood plan Development Permit guidelines.
- The developer proposes to raise the grade of most of the lot to around 2.45m GSC in order to address the minimum habitable floor Flood Construction Level of 2.6m GSC. This proposed site grade will match the proposed grade elevations of the property immediately to the west. Retaining walls will be used along the eastern property line to address the grade difference (1.0 to 1.40 m) with those adjacent lots. The expectation is that those lots will also eventually be raised to a similar elevation. Perimeter drainage will be provided to limit any water/drainage concerns along the property line.
- A landscaped buffer strip is proposed along the southern property line adjacent to Alderbridge Way – the interface with the Garden City Lands. This, combined with infill planting in the centre median of Alderbridge Way will help to create a vegetation screen when viewed from the south.
- Landscape buffers are also provided along both the eastern and western property lines as part of the development’s ESA compensation package. Details are provided later in this report.

Urban Design and Site Planning

- Vehicle access to the site will be from Alexandra Road.
- An emergency only vehicle access will be provided from Alderbridge Way. Removable bollards will be installed to restrict other vehicles from using this access.
- Zoning Bylaw parking requirements for the development are 98 regular parking stalls and 13 visitor stalls. The project proposal includes 152 regular parking stalls and 13 visitor stalls.
- As noted in the variance request, the project includes 72 inside tandem stalls. This exceeds the current Zoning Bylaw for a project of this size by 8 stalls (4 units).
- Door to door recycling and garbage pick-up will be provided for the development. To accommodate this each garage will be required to provide a designated area for indoor storage of the garbage and recycling containers. This has been included in the design plans.
- Four dwellings will front onto Alexandra Road. Each will have individual sidewalks from the street to their front doors.
- An effort has been made to improve the vegetation landscaping along the internal drive aisle incorporating trees and low shrubs wherever possible.
- Coloured stamped concrete areas are proposed at each intersection or pathway crossing along the internal drive aisle adding visual interest and serving as a visual cue for drivers.
- Approximately 40% of the dwellings will have direct access to the internal pathway that runs north-south through the site between Alexandra Road and Alderbridge Way.

Accessible Housing

- The proposed development includes fourteen convertible units that are designed with the potential to be easily renovated to accommodate a future resident in a wheelchair. The potential conversion of these units will require the installation of a stair lift or elevator (these units have been designed to accommodate either device). The developer significantly increased the number of convertible units in direct response to the Advisory Design Panel's comments.
- All of the proposed units incorporate aging in place features to accommodate mobility constraints associated with aging. These features include:
 - stairwell hand rails;
 - lever-type handles for plumbing fixtures and door handles; and solid blocking in washroom walls to facilitate future grab bar installation beside toilets, bathtubs and showers.

Architectural Form and Character

- The proposed form and massing of the buildings is consistent with the existing multiple-family residential character of the neighbourhood and meets the intent of the West Cambie Area Plan and the Alexandra Neighbourhood Land Use Map.
- The width of the proposed buildings fronting Alexandra Road will be significantly less than the existing townhouses along the north side of Alexandra Road which should create a more friendly street front character.
- The design incorporates brick and wood shingle siding at the ground level for all units and restricts vinyl to the second floor and above. This will create a clear delineation between floors and result in a more interesting facade. The character of these buildings is further enhanced with the incorporation of split timber designs and bracket detailing that help to define individual units. The addition of chimneys at the end of each building and variations

in gable peaks along the roof lines help to distinguish each building. The proposed character is in keeping with the West Cambie Area Plan guidelines.

- The two storey amenity building fronting Alexandra Road is proposed to be one storey lower in height than the building to its east to again create visual interest and variation in the streetscape. This building will carry the same split timber and bracket detailing as the residential units but will project a stand-alone single family character to the street.
 - Three separate colour schemes will be used throughout the project to differentiate individual buildings.
 - The first scheme employs dark onyx trims and brackets, “Timid White” painted fibre cement panels, “Alexandria Beige” painted shingles and “Hearthstone” toned vinyl.
 - The second scheme employs “Marshlands” brown trims and brackets, “Brandon Beige” painted fibre cement panels, “Barnboard” painted shingles and “Brownstone” toned vinyl.
 - The third scheme, primarily for the amenity building, will include “Dark Oak” and “Onyx” doors and trims, “Timid White” painted fibre cement panels, and “Volcano” stained shingle siding. The base of the amenity building will be trimmed with brick.
- All the buildings will have black laminated fibreglass shingle roofs.

Landscape Design and Open Space Design

- A 228 m² (2,461 ft²) two storey indoor amenity building is proposed to be located near the site’s entry point. The building will contain a mail room, lounge, washrooms, a fitness room, a meeting room and storage rooms.
- Outdoor amenity space totals approximately 1,503 m² (16,181 ft²) including greenspaces in the vicinity of the indoor amenity building, seating areas around a centrally located douglas fir tree and a large common area toward the southern side of the site. The common area will also contain a public art feature (detailed later in this report).
- The landscape design incorporates three play nodes for children between the ages of 18 months and 5 years. A play area beside the amenity building, an activity area beside the retained douglas fir tree and a common open lawn green space. These are connected by the crushed gravel pathway that meanders through the site. Within these nodes a number of children’s play elements are proposed including:
 - Rotating Dish – spins with an up and down effect;
 - Log Crawl Tunnel;
 - Timber stepping rounds;
 - Climbing Boulders;
 - Agility poles;
 - Undulating benches;
 - Sloped and rolling lawns;
 - Hard surface for 4 square, defined with saw-cuts; and
 - A vegetable/gourd dome.
- Perimeter fencing will typically be set back from the eastern and western property lines to define the edge between the ESA vegetated strips (outlined in the next section) and the active residential space.
- Low retaining walls will be installed along three sides of the site (northern, eastern and portions of the southern interfaces) to address grade differences with the surrounding lands

and the interior of the subject site which is proposed to be raised in order to address flood construction levels. A “Flex MSE” (i.e. vegetated engineered) retaining wall is proposed along the eastern property line providing a “softer” green edge appearance that will also allow fill to be brought up against it should the neighbouring properties eventually redevelop.

- A Letter-of-Credit for landscaping in the amount of \$394,916.72 (i.e. Non ESA: \$210,204.72, ESA \$184,712) inclusive of a 10% contingency cost is included in the DP Considerations.

Environmentally Sensitive Area Compensation Plan

The extent and quality of the designated Environmentally Sensitive Area over the subject properties was reviewed in depth via the Report to Committee from the Director of Development (RZ 13-649641 report dated June 26, 2014). The detailed Biologist’s assessments Keystone Environmental Ltd. (Biologist report dated April 17, 2014 and summary of findings report dated June 3, 2014) indicated that, based on the limited habitat value of the existing vegetation on-site, this development should provide native species compensation planting totalling approximately 1,733.8 m² in area.

The landscaping plans submitted as part of this application provide for three vegetation strips to be created along the western, eastern and southern property boundaries.

Proposed Vegetation Strips

West property boundary	6 m wide when combined with buffer strip on the adjacent development property (AmPri Development 9580-9680 Alexandra Road)
South property boundary	2.7 m to 6 m wide strip of native trees and shrubs except for the area adjacent to the interior green space – species selections to minimize agricultural issues for the Garden City Lands to the south. Taller trees and shrubs to be used.
East property boundary	3 m wide strip of native trees and shrubs that would be intended to combine with a landscaped buffer established on adjacent lands when they redevelop.

Vegetation species selections for the strips have been selected to create songbird habitat and facilitating movement of small birds and mammals. The vegetation strip along the southern property line is intended to contribute to a year round visual screen between this development and the Garden City lands to the south. Additional tree infill planting will be provided by the developer within the landscaped Alderbridge Way centre median approximately along their property frontage. This planting will be included in the Servicing Agreement associated with this development and will further enhance the visual screening from the south.

The combined ESA vegetation strips incorporated into the plan submission provide an enhanced vegetation coverage totalling 1,359.6 m² in area. The applicant has agreed to make a voluntary cash contribution of \$17,209.75 (based on \$46/m²) for environmental enhancements elsewhere in the City in recognition of the shortfall of approximately 374 m² of compensation area on the site.

The Development Permit Considerations include a requirement for registration of a covenant to protect the proposed ESA vegetation strips and to ensure their long term management based on a

“Landscape Maintenance and Integrated Pest Management Plan” prepared for this site by ETA consultants (Report on file dated August 22, 2014).

Tree Replacement Requirements

Based on the Arborist and Biologist reports, 87 bylaw sized (i.e. over 200mm dbh) are located on the site. Seventy five of these trees have been assessed as being in unsuitable condition for retention. Of the balance of the bylaw sized trees two are proposed to be retained for which special treatment measures will be required to ensure that the effects of site preload and construction activities are minimized.

A prominent Douglas fir tree is proposed for retention near the centre of the site. Retaining walls are proposed to be installed around the tree to keep required site fill material off the roots. A raised wooden deck structure is proposed around the tree within the tree well to allow residents to use the space under the tree. The tree's location near the internal pathway will make this a central focal point for residents to meet and sit.

Preservation of the second tree located at the proposed new property line adjacent to Alderbridge Way will require the frontage sidewalk to swing northward onto the subject property. A public passage right of way will be established through the Servicing Agreement to accommodate this.

The submitted landscape plans include 177 on-site replacement trees which will meet the OCP two for one requirement.

Crime Prevention Through Environmental Design

- Open space and play areas are placed so that casual surveillance is provided from surrounding and adjacent units.
- The separated pedestrian pathway through the site provides a safe convenient pedestrian access off the vehicle drive aisle.
- A lighting plan has been prepared for the site which will provide overall illumination to the internal drive aisle and lower sidewalk step mounted lighting along the internal pedestrian pathway.
- Play areas are separated from the vehicle drive aisles and are linked via the internal pedestrian path.
- Dwelling unit entry ways are readily visible from the internal drive aisle with no significant recessions that could create safety blind spots.

Sustainability Measures

The Rezoning considerations (RZ 13-649641) include requirements for achieving an Ener-Guide rating of 82 or better and pre-ducting for solar hot water heating. The developer has committed to meeting the Ener-guide 82 thresholds and to incorporating the following additional measures into the development:

- Low-E glazing on all windows;
- Energy Star appliances;
- Low VOC paints in all units;
- Dual flush toilets and low flow faucets;
- Drywall with recycled gypsum and paper content;

- Permeable surfaces for the central pathway and visitor parking stalls;
- Planting selections of native and non-native drought tolerant species;
- No irrigation;
- Locating plant species for the microclimates around the buildings;
- Developing songbird habitat incorporating food sources, refuge and nesting areas;
- Provision of a minimum of 600mm (24") soil for stormwater retention and release rate management;
- Preparation of a Landscape Maintenance and Integrated Pest Management Plan for Best Management Practices within the landscape; and
- Locally sourcing materials where possible.

Submission of the final report by the Certified Energy Advisor prior to Development Permit issuance is included in the DP Considerations.

Aircraft Noise Mitigation

The development site is located within an area defined in Richmond's Official Community Plan as "Area 2 – High Aircraft Noise". Developments within this area are required to address the City's indoor design criteria for noise. The proponent has submitted an Acoustical Evaluation report prepared by Brown Strachan Associates (dated September 17, 2014) that identifies all the required design and construction measures needed for this specific project to achieve the OCP indoor noise criteria. Both aircraft noise and traffic noise are included in the evaluation.

Specific recommendations identified in the report include:

- Provision of two layers of interior drywall directly to exterior framing (walls & or ceilings) for specific buildings and rooms within those buildings (detailed in the Acoustic report);
- Furring channels on exterior framing for areas with the double layers of drywall;
- Upgrades to window glazing on specific buildings and rooms as detailed in the Acoustic report;
- Provision of alternative means of ventilation such as air conditioning or continuously rated kitchen and/or bathroom exhaust fans as required to address ventilation requirements; and
- Make up air ducts, if required for ventilation, must provide a minimum noise reduction of 50 dB for exterior noise.

The project's mechanical consultant (Enersolv, 2014) has recommended that all the bedrooms in the development be roughed in for future installation of ceiling fans. Submission of their final report is included in the DP Considerations.

The Developer has committed to incorporating all the recommendations from both the acoustical report and the mechanical report in the development. Verification will occur through the Building Permit review.

Public Art

The Developer is working with City staff, a public art review panel, the City's Public Art Advisory Committee and a research assistant with the Centre for Wildlife Ecology at Simon Fraser University to develop a public art project that will include a habitat box for a Barn Owl. To time of writing, the artist and the design concept have been reviewed and endorsed by the

Public Art Advisory Committee. The artist is working to refine the concept for eventual installation on the site.

The Developer has also agreed to provide a voluntary contribution toward the construction of a second Barn Owl box off site within the West Cambie area. Parks staff will coordinate the construction and installation of this box. The DP Considerations includes the voluntary contribution from the Developer.

Conclusion

The applicant has made a number of significant design refinements to address both the Advisory Design Panel's concerns and staff's comments and suggestions. Additional efforts were made to work with the developer to the west (AmPri) ensuring that both projects are coordinated in their efforts to create a functional vegetation strip between the two projects and to address grade and drainage issues between the two sites.

Replacement of the existing low quality habitat present at the site with higher quality native vegetation designed to facilitate songbird and small animal movement and food supplies should result in an overall habitat improvement at this site in terms of food sources and a stronger native species mix to support small songbirds.

Staff support this Development Permit application and recommend its approval as the proposed design reasonably addresses the neighbourhood guidelines and should contribute to the overall character of the area.

Amenity Space – Outdoor:	6.0 m ² (64.59 ft ²) per unit 384 m ² total	1,503.26 m ² (16,181 ft ²)	None

Other: Tree replacement compensation required for loss of significant trees.

**Excerpt from the Minutes from
The Design Panel Meeting**

**Wednesday, July 23, 2014 – 4:00 p.m.
Rm. M.1.003
Richmond City Hall**

DP 14-667441 – 64 THREE-STOREY TOWNHOUSE DEVELOPMENT

APPLICANT: Polygon Developments
PROPERTY LOCATION: 9700 and 9740 Alexandra Road

Applicant's Presentation

Chris Ho, Vice-President of Development, Polygon introduced the presenters for the proposed townhouse development. Architect James Bussey, Formwerks Architectural Inc., and Landscape Architect Cheryl Bouwmeester, ETA Landscape Architecture, presented the project and answered queries from the Panel on behalf of the applicant.

Panel Discussion

Comments from the Panel were as follows:

- consider additional landscaping to visually break up and animate the long north-south drive aisle; townhouse facades appear similar; consider variations in facade and/or landscaping, e.g. may retain style but vary the massing/introduce additional landscaping to make the project more interesting;

We have added additional feature paving (see landscape/architectural site plan) in the north south drive aisle. In addition, we have added landscaping between the driveways and have incorporated key landscape features on the north south drive aisle.

- consider providing one convertible unit per 15 townhouse units as seen in smaller townhouse developments previously reviewed by the Panel; applicant should endeavour to meet all of the City's Convertible Unit Guidelines for Townhouses;

We are now providing 14 convertible homes for the project.

- inward opening doors in the convertible unit use up a lot of floor space; applicant is encouraged to introduce pocket doors in the washrooms and powder room of the convertible unit and regular townhouse units to add usable floor spaces;

Our corporate policy is not to install pocket doors in any units as they are prone to maintenance issues and become problematic for future home owners.

- look at accessibility of the meeting and fitness rooms on the second floor of the amenity building; a semi-circular stairway with an open space in the middle would provide potential vertical access; applicant is encouraged to work out the details for future consideration;

The stairs do provide an opening in the centre to allow for a lift if required in the future.

- consider unisex washrooms in the amenity building to free up floor space;

We are deleting one washroom and making one washroom unisex.

- pleased to see the sustainability approach in the package submitted by the applicant; however, the applicant should show more commitment to the energy consumption aspect, e.g. low-energy heating system, heating recovery, lighting density control, etc.; applicant is encouraged to consider this in the early stage of the project;

We are building to an Energuide 82 rating which provides for:

- *Energy Star Appliances*
- *Energy efficiency significantly lower than a typical standard home*

- look at the proposed location of the amenity building as it is too far from townhouse units located in the eastern portion of the lot; may impact on the usability of the amenity building;

We feel that the current site plan provides an opportunity for the amenity building to act as an identifying feature building on Alexandra Street which will provide much greater architectural interest on the street.

- appreciate the materiality of the project and attention to detail; like the flexible approach to the variation of townhouse units; consider whether there is opportunity to vary the scale of the building;

We have attentively varied the sizing and width of the buildings by both varying the number of units in buildings, using differing widths and depths of units, and the orientation of the units (certain buildings are not oriented at the typical 90 degrees)

- appreciate the landscape elements, e.g. connection to the buildings and green buffers;
- like the overall approach to the project;

- project looks good and very well resolved; appreciate the architectural and landscape design; townhouse units are worked out and interlocking very well;
- some buildings within the proposed townhouse development lack planting between the driveways; suggest that the City work with the applicant to eliminate the columns and cantilever the balconies to provide space for additional planting and introduction of planting;

We have introduced both additional planting between the driveways and also at important visual termination points – see landscape drawings

- reconsider the use of vinyl building materials; suggest that the applicant use hardie in lieu of vinyl;

We have carefully used brick and shingles at the ground level for all units. The vinyl is restricted only to the second floor and above.

- review interlocking arrangement (closet/bedroom);

We have no concerns with the current interlocking arrangement design.

- agree with the staff comment regarding additional planting and introduction of planting between driveways; suggest a single cedar hedge and not a full tree which requires more soil volume; also consider planting three to four small evergreen plants;

Revised as per landscape drawings

- the long drive aisle could be visually broken up with the use of decorative pavers and bands in other locations; will improve the quality of the space and make them useful community spaces;

Revised as per architectural site plan and landscape drawings

- appreciate the addition of more play equipment; agree with the move to distribute the play equipment around the site;
- agree with comments that the location of garbage and recycling is challenging; applicant is encouraged to look for a viable solution; and

With the cooperation of the City, we have removed the central garbage and recycling centre and replaced it with individual pick up for all homes. In the individual homes, a space within the garage has been demarcated for the garbage and recycle. There is no exterior demarcated garbage and recycle area to avoid future home owners from leaving unsightly garbage outside in the project.

- appreciate the involvement of an arborist in the project; retention of mature trees on site will enhance the value of the project.

Panel Decision

It was moved and seconded

That DP 14-667441 be supported to move forward to the Development Permit Panel subject to the applicant giving consideration to the comments of the Panel.

CARRIED

Opposed: Tom Parker

Mr. Parker clarified that he voted against the motion because he wanted to see more convertible units in the proposed development, with a ratio of one convertible unit per 15 townhouse units.

City of
Richmond

Development Permit Considerations
Development Applications Division
6911 No. 3 Road, Richmond, BC V6Y 2C1

Address: 9700, 9740 Alexandra Road

File No.: DP 14-667441

Prior to approval of the Development Permit, the developer is required to complete the following:

1. Final adoption of the Zoning Amendment Bylaw No. 9159.
2. Receipt of a Letter-of-Credit for landscaping in the amount of \$394,916.72 (i.e. Non ESA: \$210,204.72, ESA \$184,712) inclusive of a 10% contingency cost. Post installation bonding will be held for 1 year on non-ESA landscaping and 2 years for ESA landscaping.
3. City acceptance of the Developer's offer to voluntarily contribute \$17,209.75 for environmental enhancements as compensation for habitat losses incurred on site.
4. City acceptance of the Developer's offer to voluntarily contribute \$2,000.00 for the installation of a barn owl box in the West Cambie area.
5. Submission of a plan prepared by a registered Surveyor defining the ESA vegetation areas acceptable to the Director of Development.
6. Registration of an agreement on title for the protection of the site's ESA areas, ensuring that they will not be abandoned or removed and adherence to the Landscape Maintenance and Integrated Pest Management Plan as it applies to those areas.
7. Submission of a Contract entered into between the applicant and a Certified Arborist for supervision of any on-site works conducted within the tree protection zone of the trees to be retained. The Contract should include the scope of work to be undertaken, including:
 - a) the proposed number of site monitoring inspections;
 - b) a provision that the Arborist will work with City Parks Arborist staff with regard to construction activities in the vicinity of any trees located on City lands; and
 - c) a provision for the Arborist to submit a post-construction assessment report to the City for review.
8. Installation of appropriate tree protection fencing around all trees to be retained as part of the development prior to any construction activities, including building demolition, occurring on-site.
9. Submission of a report by a Certified Energy Advisor that outlines, to the satisfaction of the Director of Development, the recommendations for achieving the Ener-guide 82 criteria.
10. Submission of a report by a qualified mechanical ventilation professional that outlines, to the satisfaction of the Director of Development, the recommendations for appropriate ventilation of the development's residential units.

[Signed Original on File]

Signed _____

Date _____

No. DP 14-667441

To the Holder: Polygon Jayden Mews Homes Ltd.

Property Address: 9700 and 9740 Alexandra Road

Address: 900 - 1333 West Broadway
Vancouver, BC V6H 4C2

1. This Development Permit is issued subject to compliance with all of the Bylaws of the City applicable thereto, except as specifically varied or supplemented by this Permit.
2. This Development Permit applies to and only to those lands shown cross-hatched on the attached Schedule "A" and any and all buildings, structures and other development thereon.
3. The "Richmond Zoning Bylaw 8500" is hereby varied to increase the maximum percentage of enclosed vehicle parking spaces provided in a tandem arrangement to 57%.
4. Subject to Section 692 of the Local Government Act, R.S.B.C.: buildings and structures; off-street parking and loading facilities; roads and parking areas; and landscaping and screening shall be constructed generally in accordance with Plans #1 to #82 attached hereto.
5. Sanitary sewers, water, drainage, highways, street lighting, underground wiring, and sidewalks, shall be provided as required.
6. As a condition of the issuance of this Permit, the City is holding the security in the amount of \$394,916.72 (i.e. Non ESA: \$210,204.72, ESA \$184,712.00) to ensure that development is carried out in accordance with the terms and conditions of this Permit. Should any interest be earned upon the security, it shall accrue to the Holder if the security is returned. The condition of the posting of the security is that should the Holder fail to carry out the development hereby authorized, according to the terms and conditions of this Permit within the time provided, the City may use the security to carry out the work by its servants, agents or contractors, and any surplus shall be paid over to the Holder. Should the Holder carry out the development permitted by this permit within the time set out herein, the security shall be returned to the Holder. The City may retain the security for up to one year for non-ESA landscaping and up to two years for ESA landscaping after inspection of the completed landscaping in order to ensure that plant material has survived.
7. If the Holder does not commence the construction permitted by this Permit within 24 months of the date of this Permit, this Permit shall lapse and the security shall be returned in full.

To the Holder: Polygon Jayden Mews Homes Ltd.
Property Address: 9700 and 9740 Alexandra Road
Address: 900 - 1333 West Broadway
Vancouver, BC V6H 4C2

8. The land described herein shall be developed generally in accordance with the terms and conditions and provisions of this Permit and any plans and specifications attached to this Permit which shall form a part hereof.

This Permit is not a Building Permit.

ALL PLANTS TO BE NURSERY GROWN TO THE CURRENT EDITION OF THE BCSPA/BCSCLA STANDARDS.

ALL PLANT MATERIAL TO BE INSPECTED PRIOR TO DELIVERY ON SITE. CONTRACTOR TO AFFRANGE FOR INSPECTION AND MATERIAL TO ASSEMBLED IN ONE LOCATION FOR REVIEW.

IMPORTED GROWING MEDIA SHALL BE A SANDY LOAM OR LOAMY SAND TEXTURE (NO LESS THAN 5% SAND BY WEIGHT) CONTAINING 4 AND 15% ORGANIC MATTER (DRY WEIGHT BASIS).

GROWING MEDIA SHALL VIRTUALLY FREE FROM SUBSOIL, ROCKS, LIMESTONE, TOXIC PLANTS, TOXIC PLANT PATHOGENS, AND OTHER REPRODUCIBLE PARTS, PLANT PATHOGENS, ORGANISMS, ORGANIC OR INORGANIC MATERIALS, TOXINS, STONES OVER 30mm (1.2"), ANY DEBRIS AND FOREIGN OBJECTS.

IMPORTED GROWING MEDIA SHALL CONFORM TO AND BE TREATED AS PER SECTION 62.3 TO 62.7 INCLUSIVE OF THE 2012 BCSPA STANDARDS. GROWING MEDIUM SHALL CONFORM TO LEVEL 1 "WELL-GROOMED" AREAS: LOW TRAFFIC LAWN AREAS, TREES AND LARGE SHRUBS (1L IN TABLE T-4.3.5.1 OF THE 2012 BCSPA STANDARDS). IT SHALL POSSESS THE FOLLOWING QUALITIES:

TEXTURE:
"COARSE GRAVEL (LARGER THAN 19mm AND SMALLER THAN 40mm); 0-1% "SAND (LARGER THAN 0.05mm AND SMALLER THAN 2mm); 50-70% "FINE GRAVEL (LARGER THAN 0.02mm AND SMALLER THAN 0.075mm); 10-20% "CLAY (SMALLER THAN 0.002mm); 0-20% "CLAY AND SILT COMBINED: MAXIMUM 25%
ORGANIC CONTENT: 3-10%
Acidity (pH): 6.0-7.0

DRAINAGE: PERCOLATION SHALL BE SUCH THAT NO STANDING WATER IS VISIBLE 60 MINUTES AFTER AT LEAST 10 MINUTES OF MODERATE TO HEAVY RAIN OR IRRIGATION.

MINIMUM SOIL DEPTH TO BE AS PER TABLE T-6.3.5.5 OF THE 2012 BCSPA STANDARDS:

Over prepared subgrade where the subsoil drains rapidly	Over structures or where the subsoil drains poorly
TREES (10m ² PER TREE)	30"
LARGE SHRUBS	24"
GROUNDCOVERS	12"
LAWN-IRRIGATED	6"
LAWN-NOT IRRIGATED	6"

SOIL DEPTHS WILL BE CHECKED AT TIME OF SUBSTANTIAL COMPLETION REVIEW

ALEXANDRA ROAD

ALDERBRIDGE WAY

FOOD PATCH - INTRODUCED:
through native adaptive planting
scheme - plant material chosen
provide a food source and habitat for
nesting for songbirds and insects

CONTINUOUS VEGETATED CORRIDOR INTRODUCED
- native landscape buffer around perimeter of site
references the natural landscape prior to development,
enhances the larger scale spatial pattern with corridor of
habitat and for species movement

CONTINUOUS VEGETATED CORRIDOR INTRODUCED -
native landscape buffer around perimeter of site references the
natural landscape prior to development, enhances the larger
scale spatial pattern with corridor of habitat and for species
movement

LOCAL SCALE WATER SOURCE -
INTRODUCED: rain leaders to lead to rock
bed to animate the pathway and provide a
water source for the animal species that will
colonise the site

PERFORATED HABITAT PATCH -
INTRODUCED: in form of meandering
pathway - connecting entrances to buildings,
series of perforated habitat patches.
Boulders, logs and stepping stones provide
small scale habitat for insects and birds

LOCAL SCALE HABITAT PATCH - existing
Douglas fir to be retained as a local scale
habitat feature, provides for escape cover,
food, roosting/nesting site

HABITAT - INTRODUCED: small resource
patch, planted vegetation co-ordinated with
local birds to provide food, escape cover and
nesting habitat

PERFORATED EDGE -
INTRODUCED:
sensory planting - variety of
perennials and groundcovers that
provide for food source for a variety
of small birds and insects

HABITAT PATCH - INTRODUCED:
stabilise or anchor the edge location,
connects to adjacent open spaces
suitable for owl hunting grounds as link
in home range

Public art - owl house location TBD

LOCAL SCALE HABITAT PATCH -
existing birch tree to be retained as a
local scale habitat feature, provides for
escape cover, food, roosting/nesting site

PERFORATED EDGE -
INTRODUCED:
sensory planting - variety of
perennials and groundcovers that
provide for food source for a variety
of small birds and insects
